-------------------	---

Sommario/riassunto	The increasing number of older people in the United States has served to focus attention upon the processes of aging and the effectiveness of social programs for the elderly. In order to plan effective programs, accurate social measures are necessary. Now, more than ever before, researchers require conceptually explicit instruments designed to assess individual and social behaviors, attitudes, and traits in the elderly population. This is the first in a three-volume series designed to serve the needs of researchers, evaluators, and clinicians in assessing the instruments used in the field of a

Conclusions and Recommendations -- References -- App. A: Sources of Information -- ; App. B. Descriptions of Longitudinal Studies -- Biographical Sketches of Committee Members and Staff -- Index -- Other Reports from the Board on Children, Youth, and Families.
Sommario/riassunto	"Protecting Youth at Work looks at what is known about work done by children and adolescents and the effects of that work on their physical and emotional health and social functioning. It recommends specific initiatives for legislators, regulators, researchers, and employers." "The book provides historical perspective on working children and adolescents in the United States and explores the framework of child labor laws that govern that work. It presents a wide range of data and analysis on the scope of youth employment, factors that put children and adolescents at risk in the workplace, and the positive and negative effects of employment, including data on educational attainment and life-style choices. Protecting Youth at Work also includes discussions of special issues for minority and disadvantaged youth, young workers in agriculture, and children who work in family-owned businesses."-- Jacket.
