Autore	Vaillant George E. <1934->
Titolo	Triumphs of experience : the men of the Harvard Grant Study // George E. Vaillant
Pubbl/distr/stampa	Cambridge, Mass., : Belknap Press of Harvard University Press, 2012
ISBN	9780674071810 0674071816 9780674067424 0674067428
Edizione	[1st ed.]
Descrizione fisica	1 online resource (xi, 457 p.)
Disciplina	305.310973
Soggetti	Aging - Social aspects - United States Aging - United States - Psychological aspects Men - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Front matter -- Contents -- Cast of protagonists (decathlon score) -- 1 Maturation makes liars of us all -- 2 The proof of the pudding -- 3 A short history of the grant study -- 4 How childhood and adolescence affect old age -- 5 Maturation -- 6 Marriage -- 7 Living to ninety -- 8 Resilience and unconscious coping -- 9 Alcoholism -- 10 Surprising findings -- 11 Summing up -- Appendixes -- Notes -- Acknowledgments -- Index
Sommario/riassunto	At a time when many people around the world are living into their tenth decade, the longest longitudinal study of human development ever undertaken offers some welcome news for the new old age: our lives continue to evolve in our later years, and often become more fulfilling than before. Begun in 1938, the Grant Study of Adult Development charted the physical and emotional health of over 200 men, starting with their undergraduate days. The now-classic <i>Adaptation to Life</i> reported on the men's lives up to age 55 and helped us understand adult maturation. Now George Vaillant follows the men into their nineties, documenting for the first time what it is like to flourish far beyond conventional retirement. Reporting on all aspects of male life,

including relationships, politics and religion, coping strategies, and alcohol use (its abuse being by far the greatest disruptor of health and happiness for the study's subjects), Triumphs of Experience shares a number of surprising findings. For example, the people who do well in old age did not necessarily do so well in midlife, and vice versa. While the study confirms that recovery from a lousy childhood is possible, memories of a happy childhood are a lifelong source of strength. Marriages bring much more contentment after age 70, and physical aging after 80 is determined less by heredity than by habits formed prior to age 50. The credit for growing old with grace and vitality, it seems, goes more to ourselves than to our stellar genetic makeup.
