

1. Record Nr.	UNINA9910971075703321
Autore	Heshmati Almas
Titolo	Integrated water resource management in the Kurdistan region // Almas Heshmati
Pubbl/distr/stampa	New York, : Nova Science, c2009
ISBN	1-61728-524-2
Edizione	[1st ed.]
Descrizione fisica	1 online resource (251 p.)
Collana	Water resource planning, development and management series
Disciplina	363.6/1095667
Soggetti	Water-supply - Kurdistan - Management Water - Purification - Kurdistan Water - Government policy Integrated water development - Kurdistan
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	""INTEGRATED WATER RESOURCES MANAGEMENT IN THE KURDISTAN REGION""; ""CONTENTS""; ""PREFACE""; ""FOREWORD BY THE MINISTER OF WATER RESOURCES""; ""ACKNOWLEDGEMENTS""; ""ABBREVIATIONS""; ""INTRODUCTION AND BACKGROUND TO THE PROJECT""; ""1.1. BACKGROUND TO THE PROBLEM""; ""1.2. THE OBJECTIVES OF THIS PROJECT""; ""1.3. IMPLEMENTATION OF THIS PROJECT""; ""1.4. ORGANIZATION OF THE PROJECT""; ""1.5. STRUCTURE OF THE REPORT""; ""REVIEW OF THE LITERATURE ON ECONOMICS AND MANAGEMENT OF WATER RESOURCES""; ""ABSTRACT""; ""2.1. INTRODUCTION""; ""2.2. THE EU WATER FRAMEWORK DIRECTIVE"" ""2.3. HYDRO-POLITICS AND WATER SHARING CONFLICTS RESOLUTION""""2.3.1. Measures in Water Resource Disputes""; ""2.4. URBAN WATER MANAGEMENT PRICE AND INVESTMENT POLICIES""; ""2.5. IRRIGATION EXTERNALITIES AND CONTROL MECHANISMS""; ""2.6. ECONOMIC AND ENVIRONMENTAL ADVANTAGES OF WASTEWATER RE-USE""; ""2.7. MODELS AND METHODS USED IN EVALUATION OF POLICIES, PRICING AND FORECASTS""; ""2.8. SUMMARY AND CONCLUSIONS""; ""A COMPARATIVE REGIONAL STUDY OF WATER RESOURCES""; ""ABSTRACT""; ""3.1. INTRODUCTION""; ""3.2. INDICATORS OF WATER RESOURCES""; ""A. Different Sectors Share of GDP"" ""B. Land, Irrigation, Forest, Livestock Production and Fertilizer

Consumption"""; "C. Urban Population"""; "D. Electricity Production"""; "E. Tourism and Private Investment in Water"""; "F. Improved Sanitation Facilities and Water Resources"""; "G. Emissions and Organic Water Pollutants"""; "H. Industrial Sub-Sector Water Pollution"""; "3.3. SUMMARY OF THE COMPARATIVE REGIONAL STUDY"; "KURDISTAN REGION WATER RESOURCES IN AN HISTORICAL AND REGIONAL PERSPECTIVE"; "ABSTRACT"; "4.1. INTRODUCTION"; "4.2. GROUNDWATER IN THE KURDISTAN REGION"; "A. History and Landscape of Iraq""

""B. Groundwater in Kurdistan"""; "C. Benefits and Limitations of Groundwater"""; "D. The Effect of Pollution on Groundwater"""; "D.1. Decades of Wars, Destruction and Neglect"""; "D.2. Agriculture Waste and Pollution"""; "D.3. Household Waste in Both Urban and Rural Areas"""; "D.4. Industrial Waste Material"""; "4.3. SURFACE WATER IN KURDISTAN"; "A. Historical Background"; "B. Major Tigris Tributaries in Kurdistan"; "B.1. Greater Zab Tributary in Hawler"; "B.2. Lesser Zab Tributary"; "B.3. Khabur Tributary"; "B.4. Sirwan Tributary"; "B.5. Awa Spy (Udhem)"

""E. Dams under Construction""

Sommario/riassunto

This book examines the current economic practices of water management in the Southern Kurdistan Region (SKR) and suggests ways to change environmental conditions to encourage the region's decision makers to pursue sustainable resource development through interstate and within Kurdistan Region KRG-consumers' co-operation. The focus is on: making a comparative study of water resources between Iraq, its neighboring countries, MENA and the world averages, conducting a sector analysis to identify and quantify available water resources, the needs and sub-optimality in their uses, analyzing current allocation of water and quantifying and suggesting necessary reductions in wasteful use of water resources, designing water policies and suggesting measures that improve regional water planning and management practices, developing techniques and models in the projection of demand, supply and future utilization patterns and quantification of the water gap, suggesting alternatives for provision of water to areas facing scarcity on the basis of sustainable long-term and minimum cost solutions, suggesting necessary mechanisms for approaching interstate cooperation and for participating in the building of interregional institutions, proposing economically and environmentally optimal practices for within region and interstate cooperation and resource management, and suggesting opportunities for increased government investment in the development and management of the water market.
