

1. Record Nr.	UNINA9910971108203321
Titolo	Pollination : mechanisms, ecology and agricultural advances / / Nichole D. Raskin and Patrick T. Vuturro, editors
Pubbl/distr/stampa	Hauppauge, N.Y., : Nova Science Publishers, c2012
ISBN	1-62417-501-5
Edizione	[1st ed.]
Descrizione fisica	1 online resource (186 p.)
Collana	Botanical research and practices
Altri autori (Persone)	RaskinNichole D VuturroPatrick T
Disciplina	571.8/642
Soggetti	Pollination
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Pollination strategies: the point of view of plants-personal experiences and review of the literature / Guido Flamini -- Pollination mechanisms in Passiflora species: the common and the rare flowers - ecological aspects and implications for horticulture / M.T. Amela Garcia, P.S. Hoc -- Pollen tube growth and ovule abortion in Olea europaea (Oleaceae): a case of ovule selection? / Julian Cuevas ... [et al.] -- Application of airborne pollen data to agronomical research / H. Garcia-Mozo -- Pollen-pistil interactions in flowering plants / Houria Hadj-Arab -- The use of bees for crop pollination: history, lessons learned and the future / Carlos H. Vergara -- 2N pollen formation: 40 cytological mechanisms of nuclear neiotic restitution / Natalia V. Shamina -- Orbicules in relation to the pollination modes / B.G. Galati ... [et al.].
Sommario/riassunto	This continuing series presents original research results on the leading edge of psychology. This book reviews research on the role of child sexual abuse in the development of psychopathology; enduring personality change after catastrophic experience; the neurobiology of anxiety and affective disorders; the genetics of panic disorders; perceptual motor skills and the cognitive architecture of action; gender issues and implications in depression and suicide; alexithymia and mental health and personality characteristics in men suffering from chronic tension-type and cervicogenic headaches.
