interaction -- Complimenting women in Turkish -- Identity in service interactions -- Part VI: Discourses through suppression -- The regime of the other -- Ideological binarism in the identities of native and non-native English speakers -- Collapse of the us/them structure in persons with brain dysfunctions -- List of contributors -- Index -- Pragmatics and Beyond New Series.

Sommario/riassunto

It is natural for people to make the distinction between in-group (Us) and out-group members (Others). What is it that brings people together, or keeps them apart? Ethnicity, nationality, professional expertise or life style? And, above all, what is the role of language in communicating solidarity and detachment? The papers in this volume look at the various cognitive, social, and linguistic aspects of how social identities are constructed, foregrounded and redefined in interaction. Concepts and methodologies are taken from studies in language variation and change, multilingualism, conversation analysis, genre analysis, sociolinguistics, critical discourse analysis, as well as translation studies and applied linguistics. A wide range of languages is brought into focus in a variety of situational, social and discursive environments. The book is addressed to scholars and students of linguistics and related areas of social communication studies.
