Sommario/riassunto

The earliest known Ottoman literary source about the lives and works of calligraphers, painters, limners, and book-binders of the Ottoman and Persianate worlds, Mustafa Âli's (1541-1600) Epic Deeds of Artists (1587), was hitherto considered to be primarily a biographic dictionary. Based on a comprehensive reading of the descriptive and analytic tools of Âli's biographical writings as well as his passionately penned personal reflections on sixteenth-century attitudes toward art and artists, this critical edition by Esra Akin-Kvanç brings to the fore the significance of Epic Deeds not only as a guide to the connoisseurs and aficionados of the time, but also as a fascinating commentary by a prominent intellectual on the spiritual meaning and material value of art.

Sommario/riassunto	Manel Baucells and Rakesh Sarin have been conducting ground- breaking research on happiness for more than a decade, and in this book they distill their provocative findings into a lively, accessible guide for a wide audience of readers. Integrating their own research with the latest thinking in the behavioral and social sciences-including management science, psychology, and economics-they offer a new approach to the puzzle of happiness. Woven throughout with wisdom from the world's religions and literatures, Engineering Happiness has something to offer everyone-regardless of background, profession, or aspiration-who wants to better understand, control, and attain a more joyful life. • Shows how a few major principles can explain how happiness works and why it is so elusive • Demonstrates how the

essence of attaining happiness is choice• Explores how to avoid
happiness traps• Tells how to recognize happiness triggers in everyday
life
