Sommario/riassunto	Since The Turkish Baths (1863) by the French painter Ingres, the Far Eastern woman has, to many, been a symbol of out of reach or forbidden pleasures. Seafaring explorers, military adventurers and simple travellers from Europe over the centuries have all been enthralled by the exotic nature of the Asian woman, her foreignness accentuated by the gentle pallor of her skin. Thus arose the myth that she, of all women, was in possession of the knowledge of certain refined pleasures.

Sommario/riassunto	From the Publisher: "Using the best scientific evidence, Drugs: America's Holy War explores the impact and cost of America's "War on

Drugs"-both in public spending and in human terms. Is it possible that US drug policies are helping to proliferate, not prevent, a multitude of social ills including: homicide, property crime, the spread of AIDS, the contamination of drugs, the erosion of civil liberties, the punishment of thousands of non-violent people, the corruption of public officials, and the spending of billions of tax dollars in an attempt to prevent certain drugs from entering the country?" Arthur Benavie analyzes the research findings and argues that an end to the "War on Drugs," much as we ended alcohol prohibition, would yield enormous international benefits, destroy dangerous and illegal drug cartels, and allow the American government to refocus its attention on public well-being.
