## Sommario/riassunto

This book considers the issue of biodiversity in developing countries in relation to intellectual-property rights, community rights and human rights. Drawing together a number of case studies of developing countries rich in biological and genetic resources including India, South Africa and Brazil, the book examines the access to PGRs and their utilizations in the contexts of scientific and commercial oriented activities pursued both in the source and user countries. Exploring how community rights are protected in national biodiversity-related regulations and some international legal instrum
