

1. Record Nr.	UNINA9910971901203321
Titolo	Laboratory phonology 10 / / edited by Cecile Fougeron ... [et al.]
Pubbl/distr/stampa	Berlin ; ; New York, : Mouton de Gruyter, 2010
ISBN	9786612784057 9781282784055 1282784056 9783110224917 3110224917
Edizione	[1st ed.]
Descrizione fisica	1 online resource (810 p.)
Collana	Phonology and phonetics ; ; 4-4
Classificazione	17.54
Altri autori (Persone)	FougeronCecile <1970->
Disciplina	414
Soggetti	Grammar, Comparative and general - Phonology Linguistic change Fonologia Canvi lingüístic Congressos Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"The present volume contains a selection of the papers and commentaries, which were originally presented orally at the Tenth Conference of Laboratory Phonology (LabPhon10) held in Paris from June 29 to July 1, 2006.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Frontmatter -- Contents -- Introduction -- Acknowledgements -- List of contributors -- I. Laboratory phonology. Tenth anniversary session -- Laboratory Phonology: Past successes and current questions, challenges, and goals -- At the juncture of prosody, phonology, and phonetics - the interaction of phrasal and syllable structure in shaping the timing of consonant gestures -- Geminates at the junction of phonetics and phonology -- How abstract phonemic categories are necessary for coping with speaker-related variation -- What is LabPhon? And where is it going? -- II. Variation and language universals -- Variation in co-variation: The search for explanatory principles -- Tonal effects on perceived vowel duration -- Mixed

voicing word-initial onset clusters -- Phonetically-based sound patterns: Typological tendencies or phonological universals? -- III. Variation and the emergence of phonology -- Developing representations and the emergence of phonology: Evidence from perception and production -- Phonological templates in early words -- Constraints on the acquisition of variation -- A psycholinguistic perspective on the acquisition of phonology -- IV. Variation at the crossroad between normal and "disordered" speech -- Hard-wired phonology: Limits and latitude of phonological variation in pathological speech -- Representation and access in phonological impairment -- Intonation structure and disfluency detection in stuttering -- Prosodic structure and tongue twister errors -- Commentary on papers: Variation at the crossroad between normal and disordered speech -- V. Phonetic detail, processes and representation -- Phonetic variation as communicative system: Perception of the particular and the abstract -- Morphological effects on fine phonetic detail: The case of Dutch -igheid -- The variability of early accent peaks in Standard German -- Lexical and contextual predictability: Confluent effects on the production of vowels -- Modeling listeners: Comments on Pluymaekers et al. and Scarborough -- What is and what is not under the control of the speaker: Intrinsic vowel duration -- Variation in overlap and phonological grammar in Moroccan Arabic clusters -- Variability and homogeneity in American English // allophony and /s/ retraction -- Compensation for assimilatory devoicing and prosodic structure in German fricative perception -- Filling the perceptuo-motor gap -- Backmatter

Sommario/riassunto

The present volume contains a selection of the papers and commentaries which were originally presented at the Tenth Conference of Laboratory Phonology (LabPhon10) held in Paris from June 29 to July 1, 2006. The theme of the volume is Variation, Phonetic Detail and Phonological Representation. It brings together specialists of different fields of speech research with the goal to discuss the relevance of patterns of variation and phonetic details on phonological representations and theories. The topic is addressed from the angles of speech production, perception, acquisition, speech disorders, and language universals. The contributions are grouped thematically in five sections, each of which is commented by invited discussants. Section I contains the contributions to the special '10th anniversary session' of the conference which represent in a prototypical way some of the different research questions that have been at the core of important debates over the last 20 years in the laboratory phonology community. Issues of phonological universals and language typology are addressed in section II. In section III, the notions of variation and phonetic detail are examined with regard to how they are acquired and dealt with in the formation of phonological representation in emerging systems. Section IV focuses on recent work at the crossroad between normal and disordered speech.
