

1. Record Nr.	UNINA9910971908903321
Autore	Pustovalov V. V (Vitalii Valentinovich)
Titolo	Plasticity of metals and alloys // V.V. Pustovalov
Pubbl/distr/stampa	New York, : Nova Science Publishers, c2009
ISBN	1-60876-337-4
Edizione	[1st ed.]
Descrizione fisica	1 online resource (139 p.)
Disciplina	620.1/633
Soggetti	Materials at low temperatures Plasticity
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 111-123) and index.
Nota di contenuto	Intro -- PLASTICITY OF METALS AND ALLOYS -- NOTICE TO THE READER -- CONTENTS -- PREFACE -- I. INTRODUCTION -- II. HISTORY OF THE PROBLEM -- III. DISCOVERY OF THE INFLUENCE OF A SUPERCONDUCTING TRANSITION ON THE MACROSCOPIC CHARACTERISTICS OF PLASTIC DEFORMATION -- A. EXPERIMENTAL ARRANGEMENT -- B. CHANGES OF THE CHARACTERISTICS OF PLASTICITY AT A SUPERCONDUCTING TRANSITION -- 1. Deformation at a Constant Strain Rate -- 2. Creep -- 3. Stress Relaxation -- IV. BASIC EXPERIMENTAL CHARACTERISTICS OF THE EFFECT -- A. GENERAL AND BASIC CHARACTERISTICS OF THE EFFECT -- B. TRANSIENT PROCESSES -- 1. Deformations with Constant Strain Rate -- 2. Creep -- C. DEPENDENCE ON DEFORMATION AND STRESS -- 1. Jump of the Flow Stress with a Constant Strain Rate -- 2. Deformation Jump Under Creep Conditions -- 3. Jump of the Flow Stress Under Stress-Relaxation Conditions -- D. MAGNETIC FLUX TRAPPING -- E. STRAIN RATE DEPENDENCES -- 1. Deformation at a Constant Strain Rate -- 2. Creep -- F. CONCENTRATION DEPENDENCES OF THE CHANGE IN THE CHARACTERISTICS OF PLASTICITY AT A SUPERCONDUCTING TRANSITION -- V. EFFECT OF A SUPERCONDUCTING TRANSITION ON DEFORMATION TWINNING -- VI. CORRELATION BETWEEN THE CHARACTERISTICS OF THE EFFECT AND THE SUPERCONDUCTING PROPERTIES -- A. TEMPERATURE DEPENDENCE OF THE CHARACTERISTICS OF THE PLASTICITY CHANGE AT A SUPERCONDUCTING TRANSITION -- 1. Under the Conditions of

Deformation at a Constant Strain Rate -- 2. Under Creep Conditions --
3. Under Stress-Relaxation Conditions -- B. MAGNETIC FIELD
DEPENDENCES OF THE CHARACTERISTICS OF THE EFFECT -- 1.
Intermediate State -- 2. Mixed State -- C. EFFECT OF THE PARAMETERS
OF THE ELECTRON ENERGY SPECTRUM -- VII. BASIC THEORETICAL
CONCEPTS OF THE INFLUENCE OF A SUPERCONDUCTING TRANSITION
ON THE PLASTICITY -- A. ELECTRONIC DRAG OF DISLOCATIONS IN
NORMAL AND SUPERCONDUCTING STATES.
B. FLUCTUATION MECHANISM -- C. INERTIAL MECHANISM -- D.
THERMAL-INERTIAL MECHANISM -- E. QUANTUM-INERTIAL
MECHANISM -- F. OTHER THEORETICAL HYPOTHESES -- G.
COMPARISON OF THE THEORETICAL AND EXPERIMENTAL RESULTS -- H.
THEORETICAL HYPOTHESES CONCERNING BCC CRYSTALS -- VIII.
DIRECT EXPERIMENTS -- A. INFLUENCE OF THE SUPERCONDUCTING
STATE ON THE MOBILITY OF DISLOCATIONS IN Nb -- B. STUDY OF THE
INFLUENCE OF THE ELECTRONIC STATE ON PYRAMIDAL AND BASAL
GLIDE -- C. DISPLACEMENT OF DISLOCATION IN THE NORMAL AND
SUPERCONDUCTING STATES -- D. DEFECT STRUCTURE OF A CRYSTAL
AFTER DEFORMATION IN THE NORMAL OR SUPERCONDUCTING STATES
-- IX. NEW METHOD FOR STUDYING THE MECHANISMS OF LOW-
TEMPERATURE PLASTICITY -- A. STUDY OF DISLOCATION TUNNELING
-- B. STUDY OF LOW-TEMPERATURE JUMP-LIKE DEFORMATION -- C.
STUDY OF STRESS RELAXATION -- D. STUDY OF THE INTERACTION OF
DISLOCATIONS AND FLUXOIDS -- E. STUDY OF THE INTERACTION OF
DISLOCATIONS AND NORMALPHASE DOMAINS IN THE INTERMEDIATE
STATE -- F. PLASTIC DEFORMATION OF A COMPOSITE MATERIAL -- X.
APPLIED ASPECTS -- A. WORK HARDENING BY SUPERCONDUCTING
TRANSITIONS -- B. WORK HARDENING IN THE SUPERCONDUCTING
STATE -- C. FATIGUE IN THE NORMAL AND SUPERCONDUCTING STATES
-- D. INFLUENCE OF A SUPERCONDUCTING TRANSITION ON THE
TRIBOLOGIC PROPERTIES OF SUPERCONDUCTORS -- XI. EXPERIMENTS
ON HTSC -- XII. CONCLUSIONS -- REFERENCES -- INDEX.

Sommario/riassunto

This work features the results of observations and investigations of a new phenomenon - changes in the macroscopic characteristics of the plastic deformation of metals and alloys at a superconducting transition.
