Making history: shared perspectives and shared problems in the study of long-term change -- 4.The waves of time? A new theory of change in socio-political systems -- 5.The origins of international relations: non-state societies -- 6.Cyclical states: the long-term dynamics of socio-political systems in the age of the state -- 7.Volatile networks: socio-political dynamics in the age of the global system.
Sommario/riassunto	"This volume provides an overview of the whole range of long-term analyses in international relations. It evaluates and draws on theoretical approaches in both the humanities and social sciences - in subjects such as sociology, history, anthropology and archaeology - and recent progress in evolutionary theory and the mathematical study of complexity. The resulting analysis reinterprets processes of global political change in the past and present, and opens fresh areas of enquiry for international relations."--Bloomsbury Publishing.
