

1. Record Nr.	UNINA9910971999303321
Titolo	2005 : past meets present in astronomy and astrophysics : proceedings of the 15th Portuguese National Meeting, University of Lisbon & Lisbon Astronomical Observatory 28-30 July 2005 / / editors, Jose Afonso ... [et al.]
Pubbl/distr/stampa	Hackensack, NJ, : World Scientific, c2006
ISBN	9786611924577 9781281924575 1281924571 9789812773067 9812773061
Edizione	[1st ed.]
Descrizione fisica	1 online resource (120 p.)
Altri autori (Persone)	AfonsoJose
Disciplina	520
Soggetti	Astronomy Astrophysics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	CONTENTS ; Foreword ; Modern Astrophysics ; Evolution of the spin of Mercury and its capture into the 3/2 spin-orbit resonance ; Trans-Neptunian Objects and Associated Families: confronting colors, correlations and evolution models; The origin of the spins of Kuiper Belt objects Magnetic Turbulence in the solar wind and the earth's plasma sheet The structure revealed by Spitzer in NGC 2264 ; Recent Results on Interstellar Turbulence ; Asteroseismology and Variability of Young Stars ; On the problem of magnetic braking A first step for Automatic Stellar Parameter Determination Giant Transiting Planets Observations - GITPO ; Probing the structure and atmospheres of extra-solar planets ; What's going on in Canis Major? ; Study of three galaxy clusters at intermediate redshifts

Modelling the Warm Absorber in NGC 3783 with the TITAN code
Astrophysical Tests of Fundamental Physics
; Gamma Ray Bursts as Cosmological Probes
; Braneworld cosmology: sneutrino inflation and leptogenesis
; XCS - Current Status
Deep radio observations in the CDFS/GOODS field: optical and X-ray identifications
The nature of the optical faint sub-millijansky radio sources: the VLT/VIMOS view
; AMS - a magnetic spectrometer on the international space station
; History of Astronomy
The legacy of Sacrobosco: Tractatus de Sphaera

Sommario/riassunto

This volume considers recent theoretical and observational developments in astronomy and astrophysics with contributions on solar system bodies, extrasolar planets, star formation, galaxy evolution and cosmology. A special section is dedicated to the history of astronomy including papers on the history of the Astronomical Observatory of Lisbon, time service and legal time, the 1870 solar eclipse expedition, and a comparison between Monteiro da Rocha and Wilhelm Olbers methods for the determination of the orbits of comets.
<i>Sample Chapter(s)</i>
Chapter 1: Evolution of the Spin of Mercur
