Sommario/riassunto	Today many books appear regarding Vatican II. Yet, only very few of them manage to locate this crucial event in the life of the twentieth century Roman Catholic Church against the broad horizon of both its prehistory and its aftermath. This book does just that. In seven chapters, this volume offers a survey of the evolution of Post-Enlightenment Catholicism, in the period spanning from circa 1830 to the present, tying together the renewals proposed by the first and the Second Vatican Councils. Each phase in this evolution is discussed from a double angle: on the hand from the viewpoint of theological developments and milieu's, and on the other hand from an institutional and Church historical perspective, thus binding together these two perspectives and tracing the evolutions within Catholicism in all their pluriformity.
