

1. Record Nr.	UNINA9910972207003321
Autore	Streiner David L
Titolo	PDQ epidemiology / / David L. Streiner, Geoffrey R. Norman
Pubbl/distr/stampa	Hamilton, Ontario ; ; London, : B.C. Decker, 2009
ISBN	1-60795-131-2
Edizione	[3rd ed.]
Descrizione fisica	1 online resource (212 p.)
Collana	PDQ series
Altri autori (Persone)	NormanGeoffrey R
Disciplina	614.4
Soggetti	Epidemiology Epidemiology - Methodology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	""Front matter""; ""Contents""; ""1: Introduction to Epidemiology""; ""2: Classical Epidemiology""; ""3: Research Methodology""; ""4: Measurement""; ""5: Assessing Causation""; ""6: Ethics""; ""Appendix""; ""Index""
Sommario/riassunto	PDQ Epidemiology will help to fill the considerable gap between the exact findings of the laboratory and the uncertain world of clinical medicine. By translating the terminology of epidemiology into easy-to-understand language, the underlying scientific methods begin to emerge and make sense. The third edition reflects the maturation of the field, which now encompasses much more than the aeoerandomized, controlled trial.ae New sections explain techniques that have been introduced into the field since the previous edition, the section on RCT has been expanded, and updated examples have been incorporated. The section on measurement has also been brought into line with newer thinking on reliability and validity. Featuring unique examples titled Circular Reasoning and Anti-intellectual Pomposity Detectors (CRAP Detectors), the text helps the reader identifystudies with basic flaws in design or reasoning.
