Edizione	[1st ed.]
Descrizione fisica	1 online resource (497 p.)
Altri autori (Persone)	SzurRolene MillerSheila
Disciplina	362.2 616.8915
Soggetti	Family psychotherapy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 443-462) and index.
Nota di contenuto	pt. 1. Patients, families, and treatment approaches -- pt. 2. The psychotherapy of infancy -- pt. 3. Patients treated in adolescence -- pt. 4. Special areas of work -- pt. 5. Theory and research.
Sommario/riassunto	Extending Horizons presents a wide-ranging collection of papers by leading practitioners in the field of analytic psychotherapy with children and young people, surveying recent developments in technique and theory; the application of the discipline to special areas of work; and its integration, in certain contexts, with other systems such as family and group psychotherapy. From its origins in the traditional 'one-to-one relationship' between therapist and patient, as exemplified in the pioneering work of Anna Freud, Melanie Klein and Margaret Lowenfeld, the contributors to this present volume demonstrate how child and adolescent psychotherapy has advanced its frontiers in recent years to

deal with specific areas of concern, such as child sexual abuse and mental or physical disability, and adapted itself - sometimes, initially, as a result of pressures imposed by the lack of adequate resources - to applications in wider settings where multi-disciplinary factors are engaged and the 'one-to-one relationship' is waived in preference to parent/child, family or group modes of treatment.
