Sommario/riassunto

Representing a wide array of disciplines: economics, history, literature, political science, anthropology, and sociology, this book offers original examinations of the state of scholarship about Israel, as well as insightful assessments of contemporary Israeli society, politics, economy, and culture. The contributors review and analyze more than sixty recent publications, half of them in Hebrew or Arabic, showcasing important literature not readily accessible to European and North American readers. Continuing the tradition established by the preceding volumes, Review Essays in Israel Studies offers a rich and varied treatment of new scholarship and enhances our understanding of Israel studies today.
