1. Record Nr. UNINA9910972342603321

Titolo	Aerothermodynamics of aircraft engine components / / edited by Gordon C. Oates
Pubbl/distr/stampa	New York, N.Y., : American Institute of Aeronautics and Astronautics, c1985
ISBN	1-60086-133-4 1-60086-005-2 1-60119-204-5
Edizione	[1st ed.]
Descrizione fisica	1 online resource (559 p.)
Collana	AIAA education series
Altri autori (Persone)	OatesGordon C
Disciplina	629.134/353
Soggetti	Aerothermodynamics Aircraft gas-turbines
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.

Sommario/riassunto

Beginning with the basic principles and concepts of aeropropulsion combustion, this text goes on to explore specific processes, limitations and analytical methods as they bear on component design. The text features invited work of prominent specialists in aircraft gas turbine engines.
