Economic policy issues in the midst of the Great War on the goals of trade policy -- pt. 3. Austrian fiscal and monetary problems in the post-war period -- pt. 4. Interventionism, collectivism, and their ideological roots.
Sommario/riassunto	The present volume is devoted to some of Mises's earliest writings. As with the second volume in the series, the articles that compose this book include Mises's policy memoranda, essays, and speeches that were found in a formerly secret KGB archive in Moscow. The articles have two primary focuses: First, they reveal Mises's thoughts on the monetary, fiscal, and general economic policy problems of the Austro-Hungarian Empire before and during World War I; and second, they focus on his thoughts on the new postwar Austrian Republic after the dismantling of the Habsburg monarchy. An appendix to the volume includes a curriculum vitae that Mises's great-grandfather prepared for the Habsburg emperor in 1881 as part of his ennoblement, which gave him and his heirs the hereditary title of "Edler von." Also included is a talk that Mises delivered at his private seminar in his office at the Vienna Chamber of Commerce in the spring of 1934 on the topic of the

methodology of the social sciences. Ludwig von Mises (1881-1973) was the leading spokesman of the Austrian school of economics throughout most of the twentieth century. Richard Ebeling is Professor of Economics at Northwood University. Please note: This title is available as an ebook for purchase on [Amazon](#) , [Barnes and Noble](#) , and [iTunes](#) .
