Sommario/riassunto	This book contributes new insights into the organization of free/open source (F/OS) software communities by examining the links between learning, division of labour and commercialization, demonstrating the need for a synthesis of work on both community organization and cooperation to understand F/OS community dynamics. These aspects are examined in the light of detailed case studies of the GNOME and KDE projects. This book offers an innovative theoretical framework, a critical assessment of various methodologies for examining the
