

1. Record Nr.	UNINA9910972763103321
Autore	Barbour Julian B
Titolo	The discovery of dynamics : a study from a Machian point of view of the discovery and the structure of dynamical theories // Julian B. Barbour
Pubbl/distr/stampa	Oxford ; ; New York, : Oxford University Press, 2001
ISBN	0-19-028515-X 0-19-773220-8 1-280-83331-9 9786610833313 0-19-535110-X
Edizione	[1st ed.]
Descrizione fisica	1 online resource (775 p.)
Collana	Oxford scholarship online
Disciplina	531/.11
Soggetti	Astronomy Dynamics Motion
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Originally published: Cambridge: Cambridge University Press, 1989. Previously issued in print: 2001.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents; Introduction to Volumes 1 and 2; 1 Preliminaries; 2 Aristotle: first airing of the absolute/relative problem; 3 Hellenistic astronomy: the foundations are laid; 4 The Middle Ages: first stirrings of the scientific revolution; 5 Copernicus: the flimsy arch; 6 Kepler: the dominion of the sun; 7 Galileo: the geometrization of motion; 8 Descartes and the new world; 9 Huygens: relativity and centrifugal force; 10 Newton I: the discovery of dynamics; 11 Newton II: absolute or relative motion?; 12 Post-Newtonian conceptual clarification of Newtonian dynamics Abbreviations for works quoted frequently in the ReferencesReferences; Index
Sommario/riassunto	This book explains the history and philosophy that led to the development of classical dynamics by Newton, and then places Newtonian dynamics in the perspective of unresolved questions relating to the basic concepts of space, time and motion.
