

1. Record Nr.	UNINA9910972799503321
Titolo	Policy evaluation with computable general equilibrium models // edited by Amedeo Fossati and Wolfgang Wiegard
Pubbl/distr/stampa	London, : Routledge, 2002
ISBN	1-134-51880-3 1-280-26732-1 9786610267323 0-203-16719-8
Edizione	[1st ed.]
Descrizione fisica	1 online resource (392 p.)
Collana	Routledge applied economics
Altri autori (Persone)	FossatiAmedeo <1937-> WiegardWolfgang
Disciplina	339.5015195
Soggetti	Equilibrium (Economics) - Econometric models - Evaluation Economic policy - Econometric models - Evaluation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Policy Evaluation with Computable General Equilibrium Models; Copyright; Contents; List of figures and charts; List of tables; List of contributors; Acknowledgement; Introduction; Part I Methodology; 1 Studying the past and future with infinite-horizon simulation models; 2 Policy reform without tears; 3 The marginal cost of public funds in developing countries; 4 CGE models for practical policy analysis: The Australian experience; Part II Imperfect competition 5 An applied intertemporal general equilibrium model of trade and production with scale economies, product differentiation and imperfect competition 6 A conjectural variation computable general equilibrium model with free entry; 7 Market power in a liberalized power market: The case of Italy; Part III Environment; 8 The Kyoto Protocol: Implications of international capital mobility on trade and regional welfare; 9 Carbon taxation and various pollutants in Europe: Combining general equilibrium and integrated system approaches 10 The efficiency costs of voluntary agreements in environmental policy Part IV Pension reform; 11 The ageing of the population and justice between generations: A CGE and generational accounting

approach for Belgium; 12 Ageing population and pension reform in Italy; 13 Pension funding reforms in a small open welfare state; 14 Social security in an ageing society: An applied general equilibrium analysis; Part V Miscellaneous; 15 Can tax progression raise employment? A study of four European economies; 16 Introducing idiosyncratic uncertainty in a life-cycle CGE-model  
17 International spillover effects of a demographic shock when fiscal policy is politically responsive18 An intertemporal evaluation of accession to the European Union; Index

#### Sommario/riassunto

Computable General Equilibrium (CGE) modelling is a relatively new field in economics, however, it is rapidly becoming one of the most useful tools for policy evaluation. This book applies CGE modelling to some of the most urgent international economic policy problems, including the Kyoto Protocol, pension reform, and income taxation, and also analyses the methodological issues that arise.
