Sommario/riassunto

Providing a thorough and up-to-date overview of the full range of gynaecological cancers, Gynaecological Oncology is a concise introduction, particularly useful for trainees working towards postgraduate examinations. The first section includes introductory chapters on epidemiology, screening and prevention, imaging, pathology, surgery, radiation therapy, chemotherapy, and palliation. The second part of the book covers the gynaecological cancer types in turn; each chapter following a similar format looking at clinical issues, staging, and principles of management. Where appropriate, flow-charts and diagrams are used to help the reader assimilate complex information. A chapter is devoted to decision-making, addressing those issues clinicians and women face when deciding on optimal management in given clinical scenarios. The book is practically based and is enhanced by highlighting learning points, management algorithms and clinical images. This is an invaluable resource for all doctors and allied health professionals dealing with women with gynaecological cancers.

Sommario/riassunto	Women's contributions to Arabic and Islamic society, be they cultural, religious, medical or military, have been recorded by Muslim historians throughout the ages. No biographical dictionary of any worth was considered complete unless it mentioned prominent women, a tradition stemming from the earliest Islamic biographies which all included the female companions of the Prophet as well as mothers of notable men. However, little has been written about the contribution of women from more recent contemporary central Arabian society. Published in association with Saudi Arabia's King Abdul Aziz Fo

Sommario/riassunto

African Americans and Jungian Psychology: Leaving the Shadows explores the little-known racial relationship between the African diaspora and C.G. Jung's analytical psychology. In this unique book, Fanny Brewster explores the culture of Jungian psychology in America and its often-difficult relationship with race and racism. Beginning with an examination of how Jungian psychology initially failed to engage African Americans, and continuing to the modern use of the Shadow in language and imagery, Brewster creates space for a much broader discussion regarding race and racism in America. Using Jung's own words, Brewster establishes a timeline of Jungian perspectives on African Americans from the past to the present. She explores the European roots of analytical psychology and its racial biases, as well as the impact this has on contemporary society. The book also expands our understanding of the negative impact of racism in American psychology, beginning a dialogue and proposing how we might change our thinking and behaviors to create a twenty-first-century Jungian psychology that recognizes an American multicultural psyche and a positive African American culture. African Americans and Jungian Psychology: Leaving the Shadows explores the positive contributions of African culture to Jung's theories and will be essential reading for analytical psychologists, academics and students of Jungian and post-Jungian studies, African American studies, and American studies.
