

1. Record Nr.	UNINA9910972900903321
Autore	Wills B. A (Barry Alan)
Titolo	Wills' Mineral processing technology : an introduction to the practical aspects of ore treatment and mineral recovery // B.A. Wills
Pubbl/distr/stampa	Oxford ; ; Boston, : Butterworth-Heinemann, 2006
ISBN	0-08-047947-2 9786611051341
Edizione	[7th ed.]
Descrizione fisica	1 online resource (514 p.)
Disciplina	622/.7 622.7
Soggetti	Ore-dressing Minerals
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Chapter 1. Introduction -- Chapter 2. Ore handling -- Chapter 3. Metallurgical accounting, control and simulation -- Chapter 4. Particle size analysis -- Chapter 5. Comminution -- Chapter 6. Crushers -- Chapter 7. Grinding mills -- Chapter 8. Industrial screening -- Chapter 9. Classification -- Chapter 10. Gravity concentration -- Chapter 11. Dense medium separation (DMS) -- Chapter 12. Froth flotation -- Chapter 13. Magnetic and electrical separation -- Chapter 14. Ore sorting -- Chapter 15. Dewatering -- Chapter 16. Tailings disposal.
Sommario/riassunto	Wills' Mineral Processing Technology provides practising engineers and students of mineral processing, metallurgy and mining with a review of all of the common ore-processing techniques utilized in modern processing installations. Now in its Seventh Edition, this renowned book is a standard reference for the mineral processing industry. Chapters deal with each of the major processing techniques, and coverage includes the latest technical developments in the processing of increasingly complex refractory ores, new equipment and process routes. This new edition has been prepared by the prestigious J K Minerals Research Centre of Australia, which contributes its world-class expertise and ensures that this will continue to be the book of choice for professionals and students in this field. This latest edition

highlights the developments and the challenges facing the mineral processor, particularly with regard to the environmental problems posed in improving the efficiency of the existing processes and also in dealing with the waste created. The work is fully indexed and referenced. · The classic mineral processing text, revised and updated by a prestigious new team · Provides a clear exposition of the principles and practice of mineral processing, with examples taken from practice · Covers the latest technological developments and highlights the challenges facing the mineral processor · New sections on environmental problems, improving the efficiency of existing processes and dealing with waste.
