Sommario/riassunto	In spite of its small size, the Hungarian Communist party (HCP), founded in the fall of 1918, has played an important role both in Hungary's national history and in the international communist movement. Hungary, which was the only soviet republic other than the ephemeral Bavarian soviet republic to exist outside the USSR, lasted five months during the critical period of the Paris Peace Conference. The "veterans" of the Hungarian soviet republic, like Bela Kun, Georg Lukacs, and Eugen Varga, later held important posts in the Comintern and in the international Communist press. In the Stalinist era, the HCP distinguished itself by excessive zeal in the application of "integral Stalinism" in foreign policy (e.g., anti-Titoism), the economy, and political life (e.g., the Rajk and Kadar trials). However, the 1956 revolution was engineered by the revisionist communist intelligentsia and by such revisionist party leaders as Imre Nagy. Finally, in spite of its repressive role after the revolution, in the 1970s under Janos Kadar the HCP introduced a new system of "liberalism" and economic reform.

Sommario/riassunto	As 'visual animals' architects continue to live and work in a pictorial age in which image-making remains the central activity of environmental design. Selling Architectural Ideas explores the promotional role of architectural graphics and drawing at the point of communication, i.e. at their point of sale. By substituting the words 'communication' and 'presentation' with the word 'selling' we confront the reality of a highly competitive world in which the process of creating images for selling architectural ideas is approached as a more persuasive and, therefore, more successful design tool.
