| Sommario/riassunto      | Eight well-known political scientists, economists, and sociologists here explore the interrelationships between the various levels of economic strength and political stability attended by newly emerged nations and the formulation of their foreign policies. These essays provide testimony not only to the importance of these problems, but also to contributions that can be made by various methodological approaches by scholars from the different social sciences. Contributing to the volume are Rupert Emerson, Benjamin Higgins, Gayl Ness, Ivo and                                                               |

| <b>Sommario/riassunto</b>      | In this report The Breast Cancer Research Foundation (BCRF) and the Institute of Medicine (IOM) present a one-day symposium that was held                                                                                                                                                                                 |

at the IOM to further disseminate the conclusions and recommendations of the joint IOM and National Research Council report, Saving Women's Lives: Strategies for Improving Breast Cancer Detection and Diagnosis . The committee assembled for this event was asked to share insights and consider ways in which the objectives of the report could be achieved from the standpoint of what women need to know, the best models of screening programs, manpower, risk stratification, basic research, and payment. This symposium seeks to provide continuing food for thought and ideas for actions in support of breast cancer detection and diagnosis and saving women's lives.
