Nota di bibliografia	Includes bibliographical references (p. 126-129).
Nota di contenuto	""Front Matter""; ""Contents ""; ""Abstract ""; ""1 Introduction""; ""2 Plenary Session""; ""3 Simultaneous Group Discussions with Invited Speakers ""; ""4 Wrap-Up Session ""; ""References ""; ""Appendix: Symposium Agenda""
Sommario/riassunto	In this report The Breast Cancer Research Foundation (BCRF) and the Institute of Medicine (IOM) present a one-day symposium that was held at the IOM to further disseminate the conclusions and recommendations of the joint IOM and National Research Council report, Saving Women's Lives: Strategies for Improving Breast Cancer

Detection and Diagnosis . The committee assembled for this event was asked to share insights and consider ways in which the objectives of the report could be achieved from the standpoint of what women need to know, the best models of screening programs, manpower, risk stratification, basic research, and payment. This symposium seeks to provide continuing food for thought and ideas for actions in support of breast cancer detection and diagnosis and saving women's lives.
