**Sommario/riassunto**

"Transforming Cities examines the profound changes that have characterised cities of the advanced capitalist societies in the final decades of the twentieth century. It analyses ways in which relationships of contest, conflict and co-operation are realised in and through the social and spatial forms of contemporary urban life. This book focuses on the impact of economic restructuring and changing forms of urban deprivation and social exclusion. It contends that these processes are creating new patterns of social division and new forms of regulation and control. "--Provided by publisher.
