

1. Record Nr.	UNINA9910973353403321
Autore	Schummer Rick
Titolo	Deploying Visual FoxPro solutions / / Rick Schummer, Rick Borup, Jacci Adams
Pubbl/distr/stampa	Whitefish Bay, WI, : Hentzenwerke Publishing, c2004
ISBN	1-280-54427-9 9786610544271 1-930919-33-6
Descrizione fisica	xxxviii, 486 p. : ill
Disciplina	005.75/65
Soggetti	Database management Application software - Development Computer software - Marketing Selling - Computer programs
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from title screen.
Nota di bibliografia	Includes bibliographic references and index.
Nota di contenuto	Intro -- Our Contract with You, The Reader -- List of Chapters -- Table of Contents -- Acknowledgements -- About the Author -- How to Download the Files -- Introduction -- Chapter 1 Deployment Fundamentals -- What is deployment? -- Installation is only part of deployment -- Pre-implementation -- Implementation -- Post-Implementation -- Why you should care (why it is so important to get it right!) -- Do I need a Setup? -- A basic checklist for deploying Visual FoxPro apps -- VFP Source Code issues -- Customer environment -- Application specific testing -- Network and Operating System issues -- General hardware requirements: What do you need physically besides VFP to deploy a solution? -- Can't avoid this: What you must include for deployment -- Can't touch this, or can you? -- Conclusion -- Chapter 2 Planning for Success -- Computing Environment -- Workstation inventory -- OS Platforms -- Networking -- Database platforms -- Integration with other applications and technologies -- Internet connectivity -- Physical office layout -- Need to order new equipment -- Dealing with the unexpected -- Clients -- Dealing with customers -- Working with subject matter experts -- Talking to the real or end

users -- Handling those "special case" customers -- Preparation -- Images -- EXE version details -- Training materials for end users -- Training materials for support staff -- Duplication -- User communications -- Determining ship readiness -- Requirements -- Feature sets -- Prototypes -- Preparing customers for testing -- Delivery dates -- Sign-on -- Conclusion -- Chapter 3 Packaging the Installation -- When is it ready? -- Getting ready for delivery -- Testing -- Executable components -- Help -- Data conversion -- Visual FoxPro runtimes and dependencies -- Third party controls and libraries -- Organizing the setup -- Directories. Installation schemes/feature sets -- How do you package the install? -- OS and third party components -- Utilities to consider shipping -- Delivery mechanisms -- Diskettes -- Zip/Jaz/SuperDisk disks -- Memory sticks -- CD-ROM and DVDs -- E-mail -- FTP -- Web site downloads -- Symantec's pcAnywhere -- Terminal Services and Citrix -- Conclusion -- Chapter 4 Setup Tool Roundup -- What is a setup? -- What features are available? -- What tools are available? -- ActiveDelivery -- Ghost Installer Studio -- Inno Setup -- InstaFox -- InstallShield -- Setup Factory -- Tarma Installer -- Wise Solutions -- Why are the current installer tools better than the VFP Setup Wizard? -- Deployment Tool Selection Process -- Products Considered -- Making the choice -- Conclusion -- Chapter 5 Windows Installer Inside and Out -- Overview of Windows Installer -- The evolution of software installation -- The arrival of Windows Installer -- Windows Installer Design Objectives -- Working with Windows Installer -- Structure of a Windows Installer setup package -- Features and components -- Merge Modules -- Inside an MSI file -- GUIDs, GUIDs, everywhere a GUID -- Updates, upgrades, and patches -- New bits for old -- Small updates -- Minor upgrades -- Major upgrades -- Patches -- What happens when I run setup.exe? -- The setup launcher program -- MSIEXEC - the Windows Installer executable program -- Install sequence -- Caching the MSI file -- Versioning rules during installs -- Some common problems and what to do about them -- Another version of this product is already installed -- The feature you are trying to use is unavailable -- I want my application to be available to all users -- The Windows Installer Clean Up Utility -- Conclusion -- Chapter 6 Workstation and Traditional LAN Applications Step-By-Step -- Single workstation-Single-user -- Single workstation with multiple-users. Local Area Network-multiple-user -- Stories -- General implementation issues -- Security -- Executables -- Data -- Configuration file (FPW) -- Temporary files -- Other configuration settings and Registry -- Runtimes -- Shortcuts -- ActiveX controls and COM objects -- Automation -- ODBC DSN -- FoxTools and other FLLs -- Help files -- Reports -- Native Visual FoxPro (FRX) -- Crystal Reports -- Generating a setup, step-by-step -- Step 1-Organizing your setup -- Step 2-Specifying files deployed -- Step 3-Configuring the target computer -- Step 4-Customizing the setup steps -- Step 5-Defining setup requirements and actions -- Step 6-Building the install package -- What can go wrong during a deployment? -- Implementation -- Application -- Environment -- Conclusion -- Chapter 7 Client/Server Applications Step-By-Step -- Stories -- Performance is king -- Indexes still matter -- Security fundamentals from school of black and blue -- General implementation issues -- Installing a new backend database -- Restoring a backup -- Running a script to create the database and database objects -- Using SQL-DMO -- Data Transformation Services (DTS) -- MSDE vs. SQL Server -- Installing MSDE -- Database Administrators and security -- Generating a setup, step-by-step -- Step 1-Organizing your setup -- Step 2-

Specifying files deployed -- Step 3-Configuring the target computer --
The rest of the story -- What can go wrong during a deployment? --
Implementation -- Application -- Environment -- Conclusion --
Chapter 8 Release and Post-Release Tips -- Checklist/Instructions --
Test area -- Backups -- Runtimes -- Configuration files & --
registry -- Update structures and indexes -- Data conversion -- Test
-- Notify the customer -- Technical support -- Communication
mechanisms -- Frequently Asked Questions (FAQ) -- Help file --
Training -- Web site.
Considerations for small shops -- Post implementation -- Post-
mortem review -- Customer follow-up -- Bug tracking -- Developer
review -- Post release party -- Bonus pool -- Conclusion -- Chapter 9
Support and Ch-Ch-Changes -- Support -- Recovering corrupt or lost
data -- Visual FoxPro database structures and maintenance -- SQL
database structures and maintenance -- Runtime command window --
Ch-Ch-Changes -- What needs to be updated? -- Update architecture
-- Version numbers -- Upgrade installs -- Uninstalling -- Conclusion
-- Chapter 10 Security -- Data security -- Application security --
Source code security and decompilers -- How we tested the
decompilers -- ReFox MMII -- yRecover -- Others -- HTML Help files
-- Conclusion -- Chapter 11 The What and Why of 'Wares -- What is
shareware? -- What is freeware? -- Demoware -- Crippleware --
Nagware -- What is vertical market? -- What is custom? -- Prototype-
friend or foe? -- What is limited licensing? -- Deployment and support
considerations -- Conclusion -- Chapter 12 Legalese -- Computer Law
Terminology 101 -- Intellectual property -- Copyright --
Creative/Original work -- Derivative work -- Work for hire -- Exclusive
rights -- Copyrights for software developers -- Securing copyright --
Length of protection -- Transfer of copyright -- Exclusive rights -- Fair
Use -- Digital Millennium Copyright Act of 1998 -- Display the
copyright in the software and during installation -- The contract --
What is a contract? -- Why do we need a contract? -- Who should
supply the contract? -- What could go wrong with a handshake? --
Contract clauses -- The static contract clauses -- Parties -- Ongoing
support -- Ownership-who owns what? -- The five types of program
code -- Source code options -- What are my licensing options? --
Confidentiality -- Non-Compete -- Guarantees -- Client
responsibilities -- Acceptance clause.
Contract termination methods -- Settling disputes -- Severability --
Extension conditions -- Governing law -- The dynamic contract clauses
-- Definition of services -- Project scope -- Payment schedule --
Exceptional expenses -- Support clause -- Licensing issues --
Licensing your product -- Per user license -- Per machine license --
Volume licensing -- License enforcement -- Licensing third party
products -- Summary -- Top 5 lessons learned -- Links -- Conclusion
-- Appendix A How To: InstallShield Express -- What is InstallShield
Express? -- How do I install InstallShield Express? -- Installing ISX VFP
LE -- Installing the VFP runtime redistributable files -- Upgrading from
ISX VFP7 LE to ISX VFP8 LE -- InstallShield Express-Visual FoxPro
Limited Editions -- VFP 7 Edition -- VFP 8 Edition -- InstallShield
Express-Full Version -- Creating a setup package with InstallShield
Express -- The Sample Application -- Creating a new InstallShield
Express project -- Using the InstallShield Express IDE -- Building the
setup package -- Deploying the application -- Creating a patch with
InstallShield Express 4.0 -- Overview -- The QuickPatch project wizard
-- The QuickPatch IDE -- Deploying the patch -- Conclusion --
Appendix B How To: Wise for Windows Installer -- What is Wise for
Windows Installer? -- Creating a setup package with Wise for Windows

Installer -- The Sample Application -- Creating a new Wise for Windows Installer project -- Using the Installation Expert -- Project Definition group -- Feature Details group -- Release Definition group -- Building the deployment package -- Compiling the project -- Testing the setup -- Running the setup -- Distributing the setup -- Upgrades and patches -- Creating an upgrade -- Creating a patch -- Conclusion -- Appendix C How To: InstaFox -- About InstaFox -- What is the InstaFox Wizard?.

What is the InstaFox Installer?.

Sommario/riassunto

Ship it Music to your ears or words that cause a cold sweat as you realize you now need to deploy the solution you have worked on for so long? Have you planned the deployment? Do you have the proper language in your contract with your customer? Do you have the proper install package? Do you even know what features your installer needs or how to use one of the many installers? What media is the package going to be shipped on to the client? How will it be distributed? Is the customer even ready? What happens after Setup.exe finishes? Do you have the support infrastructure in place? How are you going to handle updates and changes? There s a lot to think about, and deploying a solution requires careful planning. These questions and many more are answered based on real world experience within the pages of this book."
