#### Sommario/riassunto

This book takes a look at the evolution of crime fiction. Considering 'criminography' as a system of inter-related sub-genres, it explores the connections between modes of literature such as revenge tragedies, the gothic and anarchist fiction, while taking into account the influence of pseudo-sciences such as mesmerism and criminal anthropology.

Sommario/riassunto	The theory of linear Volterra integro-differential equations has been developing rapidly in the last three decades. This book provides an easy to read concise introduction to the theory of ill-posed abstract Volterra integro-differential equations. A major part of the research is devoted to the study of various types of abstract (multi-term) fractional differential equations with Caputo fractional derivatives, primarily from their invaluable importance in modeling of various phenomena appearing in physics, chemistry, engineering, biology and many other sciences. The book also contributes to th
