

1. Record Nr.	UNINA9910973626703321
Autore	Parrish Geoffrey <1933->
Titolo	Carburizing : microstructures and properties // Geoffrey Parrish
Pubbl/distr/stampa	Materials Park, Ohio, : ASM International, c1999
ISBN	9781523163649 152316364X 9781627083379 1627083375 9781615032228 1615032223
Edizione	[1st ed.]
Descrizione fisica	vii, 247 p. : ill
Disciplina	672.3/6
Soggetti	Case hardening Steel - Metallography Steel - Heat treatment
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from title screen.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Contents -- Preface to First Edition -- Preface to Second Edition -- Introduction and Perspectives -- Chapter 1 Internal Oxidation -- Chapter 2 Decarburization -- Chapter 3 Carbides -- Chapter 4 Retained Austenite -- Chapter 5 Influential Microstructural Features -- Chapter 6 Core Properties and Case Depth -- Chapter 7 Postcarburizing Thermal Treatments -- Chapter 8 Postcarburizing Mechanical Treatments -- Index.
Sommario/riassunto	Based on his training in metallurgy and experience in a large British gear manufacturing company, Parrish reviews the microstructural features of metal products that have been carbon case-hardened, and the influence of those features on the more important material properties. He is not concerned wit
