Sommario/riassunto

First published in 2003, this is a study of the syntactic behaviour of personal pronoun subjects and the indefinite pronoun *man*, in Old English. It focuses on differences in word order as compared to full noun phrases. In generative work on Old English, noun phrases have usually divided into two categories: 'nominal' and 'pronominal'. The latter category has typically been restricted to personal pronouns, but despite striking similarities to the behaviour of nominals there has been good reason to believe that *man* should be grouped with personal pronouns. This book explores investigations carri
