

1. Record Nr.	UNINA9910973798503321
Titolo	Tuberculosis in the workplace // Marilyn J. Field, editor ; Committee on Regulating Occupational Exposure to Tuberculosis, Division of Health Promotion and Disease Prevention, Institute of Medicine
Pubbl/distr/stampa	Washington, D.C., : National Academy Press, c2001
ISBN	9780309171250 0309171253 9780309502634 0309502632
Edizione	[1st ed.]
Descrizione fisica	1 online resource (335 p.)
Altri autori (Persone)	FieldMarilyn J (Marilyn Jane)
Disciplina	614.5/42/0973
Soggetti	Tuberculosis - United States Medical personnel - Health risk assessment - United States Tuberculosis - Prevention - Government policy - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	""Cover""; ""Front Matter""; ""Acknowledgments""; ""Contents""; ""Summary""; ""1 Introduction""; ""2 Basics of Tuberculosis""; ""3 Occupational Safety and Health Regulation in Context""; ""4 Comparison of CDC Guidelines and Proposed OSHA Rule""; ""5 Occupational Risk of Tuberculosis""; ""6 Implementation and Effects of CDC Guidelines""; ""7 Regulation and the Future of Tuberculosis in the Workplace""; ""References""; ""A Study Origins and Activities""; ""B The Tuberculin Skin Test""; ""C The Occupational Tuberculosis Risk of Health Care Workers"" ""D Effects of CDC Guidelines on Tuberculosis Control in Health Care Facilities""; ""E OSHA in a Health Care Context""; ""F Respiratory Protection and Control of Tuberculosis in Health Care and Other Facilities""; ""G Recommendations of the Institute of Medicine Committee on Eliminating Tuberculosis in the United States""; ""H Committee Biographies""
Sommario/riassunto	Before effective treatments were introduced in the 1950s, tuberculosis was a leading cause of death and disability in the United States. Health

care workers were at particular risk. Although the occupational risk of tuberculosis has been declining in recent years, this new book from the Institute of Medicine concludes that vigilance in tuberculosis control is still needed in workplaces and communities. *Tuberculosis in the Workplace* reviews evidence about the effectiveness of control measures—such as those recommended by the Centers for Disease Control and Prevention—intended to prevent transmission of tuberculosis in health care and other workplaces. It discusses whether proposed regulations from the Occupational Safety and Health Administration would likely increase or sustain compliance with effective control measures and would allow adequate flexibility to adapt measures to the degree of risk facing workers.
