

1. Record Nr.	UNIPARTHENOPE000005712
Autore	Cavanna, Adriano
Titolo	Storia del diritto moderno in Europa / Adriano Cavanna
Pubbl/distr/stampa	Milano : Giuffrè, 1982
ISBN	88-14-03192-4
Edizione	[Ristampa inalterata]
Descrizione fisica	v. ; 24 cm
Disciplina	340.9
Collocazione	340-S/2 [I] B-0078
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	1.: Le fonti e il pensiero giuridico

2. Record Nr.	UNINA9910973801603321
Titolo	Exposure of the American people to Iodine-131 from Nevada nuclear-bomb tests : review of the National Cancer Institute report and public health implications // Committee on Thyroid Screening Related to I-131 Exposure, Board on Health Care Services, Institute of Medicine, and Committee on Exposure of the American People to I-131 from the Nevada Atomic Bomb Tests, Board on Radiation Effects Research, Commission on Life Sciences, National Research Council
Pubbl/distr/stampa	Washington, D.C., : National Academies Press, 1999
ISBN	9786612081378 9780309173698 0309173698 9781282081376 1282081373 9780309522489 030952248X 9780585047294 0585047294
Edizione	[1st ed.]
Descrizione fisica	1 online resource (288 p.)
Disciplina	362.1/969897/00973

Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Front Matter -- Preface -- Acknowledgments -- Contents -- Executive Summary -- 1 Introduction -- 2 Review of the NCI Radiation Dose Reconstruction -- 3 Health Risks of I-131 Exposure -- 4 Implications for Clinical Practice and Public Health Policy -- 5 Communicating with the Public about Exposure to Iodine-131 -- 6 Research Needs -- References -- Glossary -- Appendix A Study Activities -- Appendix B Copy of the Memorandum from Dr. Charles Land to Dr. Richard Klausner
Sommario/riassunto	In 1997, after more than a decade of research, the National Cancer Institute (NCI) released a report which provided their assessment of radiation exposures that Americans may have received from radioactive iodine released from the atomic bomb tests conducted in Nevada during the 1950s and early 1960s. This book provides an evaluation of the soundness of the methodology used by the NCI study to estimate: Past radiation doses. Possible health consequences of exposure to iodine-131. Implications for clinical practice. Possible public health strategies--such as systematic screening for thyroid cancer--to respond to the exposures. In addition, the book provides an evaluation of the NCI estimates of the number of thyroid cancers that might result from the nuclear testing program and provides guidance on approaches the U.S. government might use to communicate with the public about Iodine-131 exposures and health risks.
