6. Igneous Rocks -- Chapter 7. Folding with Cleavage -- Further Reading -- Index.

Sommario/riassunto	Introduces the skills of geological map interpretation, relating map interpretation to the morphology of the most important types of geological structure, for use by students with a minimum of tutorial supervision in first-year undergraduate courses and for A-level geology. Chapters on folding, faulting, and unconformity emphasize developing three-dimensional visualization skills, and include bandw photos next to map representation and problems.
