

1. Record Nr.	UNINA9910973919003321
Titolo	Current vascular surgery 2012
Pubbl/distr/stampa	[Place of publication not identified], : People's Medical Pub House USA, 2013
Descrizione fisica	1 online resource (532 pages)
Disciplina	617.4/13
Soggetti	Vascular Surgical Procedures - methods Minimally Invasive Surgical Procedures - methods Vascular Diseases - surgery
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Intro -- Preface -- Acknowledgments -- Contents -- Contributors -- Section I Cerebrovascular Disease -- 1 Interviews of Leaders and Contributors in Vascular Surgery -- 2 Effects of Age on CAS Results: Data from CREST -- 3 Trans-cervical Carotid Stenting with Carotid Flow Reversal for Cerebral Protection -- 4 Early CEA After Stroke -- 5 Cognitive Changes After Carotid Endarterectomy and Carotid Artery Stenting -- Section II Supra-aortic Trunk Disease -- 6 Current Management of Acute Spontaneous Carotid Dissections -- 7 Effects of Renal Disease on Carotid Endarterectomy and Carotid Artery Stenting Outcomes -- 8 Vertebral Artery Stenting -- 9 Aortic Arch Debranching for TEVAR: Open Surgical Options -- 10 Aortic Arch Debranching for TEVAR: Endovascular Options -- Section III Lower Extremity Arterial Disease -- 11 Technical Tips to Improve Outcomes of Distal Lower Extremity Bypass Surgery -- 12 Hybrid Approaches for Iliofemoral Arterial Occlusive Disease -- 13 Sutureless Anastomosis in Femoral-Popliteal Bypass for Lower Extremity Revascularization -- 14 Update on Clinical Trials Evaluating the Effect of Biologic Therapy in Patients with Critical Limb Ischemia -- 15 Liquid Cast Arterial Stents: Stents of the Future -- Section IV Lower Extremity Venous Disease -- 16 Management of Venous Trauma: Civilian and Military Injuries -- 17 Iatrogenic Venous Injuries -- 18 Common Femoral Endovenectomy for Postthrombotic Syndrome -- 19 Isolated Distal Deep Venous

Thrombosis -- 20 Algorithm for Bulging Varicose Veins -- 21 Practical Approaches to Type II Endoleaks After EVAR -- 22 Next Generation Abdominal Endografts: Clinical Context and Devices -- 23 EVAR Explants Definitive Remediation -- 24 Perigraft Seromas Following Open Aortic Reconstruction -- 25 Aortic Surgery and Interventions in Patients with Connective Tissue Disorders.

Section VI Visceral and Renal Artery Disease -- 26 Visceral Artery Reconstruction -- 27 In Situ Renal Artery Aneurysm Repair -- 28 Open Surgical Treatment of Mesenteric Occlusive Disease -- 29 Contemporary Management of Acute Type B Aortic Dissection --

Section VII Thoracic Aortic Disease -- 30 Acute Type B Dissections: Open Surgical Options -- 31 Endovascular Management of Type B Aortic Dissections -- 32 Simultaneous TEVAR and EVAR -- 33 Endovascular Repair of Mycotic Thoracic Aortic Aneurysms and Fistulas -- 34 Management of Late TEVAR Failures -- Section VIII Thoracoabdominal Disease -- 35 Disease Progression After Surgery for Takayasu Arteritis -- 36 Hybrid Endovascular Repair of Thoracic and Thoracoabdominal Aortic Aneurysms -- 37 Chimney, Snorkel, Periscope Combined with EVAR/TEVAR -- 38 Branched and Fenestrated TEVAR for Thoracoabdominal Disease -- 39 Spinal Cord Protection After Open Thoracoabdominal Aortic Aneurysm Repair -- 40 Technical Tips for Renal Cell Cancer Caval Tumor Thrombus Removal -- Index.

Sommario/riassunto

Current Vascular Surgery 2012 covers the full spectrum of vascular surgery and includes changes in management of extracranial cerebrovascular disease, new treatment options for lower extremity arterial occlusive disease, novel techniques for complex venous disease, as well as recent cutting-edge developments in aortic stent graft repair in the chest and abdomen, and much more. Current Vascular Surgery 2012 is sponsored by the Division of Vascular Surgery at the Feinberg School of Medicine, Northwestern University in Chicago, Illinois and is part of the Modern Trends in Vascular Surgery series. Modern trends in Vascular Surgery series brings together the best, current strategies for therapeutic and clinical practices. **KEY FEATURES *** Examines the treatment options for areas of vascular surgery * Provides the latest information on treatment for all modalities * Describes assessment and treatment approaches * Summarizes the advancements in the treatment
