

1. Record Nr.	UNINA9910974201603321
Autore	Labrecque Joseph
Titolo	Flash development for Android cookbook : over 90 recipes to build exciting Android applications with Flash, Flex, and AIR // Joseph Labrecque ; [foreword by Scott Janousek]
Pubbl/distr/stampa	Birmingham, U.K., : Packt Pub., 2011
ISBN	9786613349729 9781283349727 1283349728 9781849691437 1849691436
Edizione	[1st ed.]
Descrizione fisica	1 online resource (372 p.)
Altri autori (Persone)	JanousekScott
Disciplina	005.252 005.265 005.268
Soggetti	Application software - Development
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Quick answers to common problems"--Cover. Includes index.
Nota di contenuto	Cover; Copyright; Credits; Foreword; About the Author; About the Reviewers; www.PacktPub.com; Table of Contents; Preface; Chapter 1: Getting Ready to Work with Android: Development Environment and Project Setup; Introduction; Using Flash Professional CS5.5 to develop Android applications; Targeting AIR for Android with Flash Professional CS5.5; Using Flash Builder 4.5 to develop Android applications; Enabling Flash Builder 4 or Flex Builder to access Flex Mobile SDKs; Using Flash Builder 4 and below to develop Android applications; Enabling Powerflasher FDT 4.1 to access Flex Mobile SDKs Using Powerflasher FDT 4.1 and below to develop Android applicationsConverting a standard Flex project to a Flex Mobile project; Configuring the AIR SDK to package AIR for Android applications on Windows; Configuring the AIR SDK to package AIR for Android applications on Linux or Mac OS; Chapter 2: Interaction Experience: Multitouch, Gestures, and Other Input; Introduction; Detecting

supported device input types; Detecting whether or not a device supports multitouch; Verifying specific gesture support for common interactions; Using gestures to zoom a display object  
Using gestures to pan a display object  
Using gestures to swipe a display object  
Using gestures to rotate a display object; Accessing raw touchpoint data; Creating a custom gesture based upon touchPoint data; Emulating the Android long-press interaction; Invoking the virtual keyboard programmatically; Responding to Android soft-key interactions; Responding to trackball and D-Pad events; Chapter 3: Movement through Space: Accelerometer and Geolocation Sensors; Introduction; Detecting whether or not an Android device supports the accelerometer; Detecting Android device movement in 3D space  
Adjusting the accelerometer sensor update interval  
Updating display object position through accelerometer events; Switching between portrait and landscape based upon device tilt; Detecting whether or not a device supports a geolocation sensor; Retrieving device geolocation sensor data; Adjusting the geolocation sensor update interval; Retrieving map data through geolocation coordinates; Chapter 4: Visual and Audio Input: Camera and Microphone Access; Introduction; Detecting camera and microphone support; Using the traditional camera API to save a captured image  
Using the Mobile CameraUI API to save a captured photograph  
Using the Mobile CameraUI API to save a captured video; Using the device microphone to monitor audio sample data; Recording Microphone Audio Sample Data; Chapter 5: Rich Media Presentation: Working with Images, Video, and Audio; Introduction; Loading photographs from the device cameraRoll; Applying Pixel Bender Shader effects to loaded images; Playing video files from the local file system or over HTTP; Playing remote video streams over RTMP; Playing audio files from the local file system or over HTTP  
Generating an audio spectrum visualizer

Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	La construction de la nature en patrimoine ne relève pas seulement d'actions de conservation des ressources et espaces, mais également de stratégies économiques, politiques et identitaires. Au-delà de la diversité des objets et des acteurs, cet ouvrage explore les liens entre revendications patrimoniales, identitaires et territoriales. Les approches – historique, géographique, juridique ou anthropologique – permettent de dévoiler les composantes des conflits fonciers et de s'interroger sur le statut des savoirs locaux en Afrique et à Madagascar. Cet ouvrage s'adresse autant aux scientifiques qu'aux gestionnaires et décideurs et

propose des pistes de réflexion et d'action pour la conservation de la biodiversité et la maîtrise partagée des ressources. The conception of nature as heritage or patrimony depends not only on the preservation of species and spaces, but also on economic, political and community-identity strategies. Going beyond the diversity of the objects and actors involved, this work explores the relationships between claims based on notions of patrimony, identity and territory. Different approaches – historical, geographical, legal and anthropological – reveal the components at work in land and property conflicts, and address the issue of the status of local knowledge in Africa and in Madagascar. This work proposes new directions for thinking and action to advance biodiversity conservation and joint resource management. It is intended for an audience of managers and decision-makers, as well as for scientists.
