

1. Record Nr.	UNINA9910974205803321
Autore	Moncke Doris
Titolo	Photoionization of polyvalent ions / / Doris Moncke and Doris Ehrt
Pubbl/distr/stampa	New York, : Nova Science Publishers, c2010
ISBN	1-61728-661-3
Edizione	[1st ed.]
Descrizione fisica	1 online resource (94 p.)
Collana	Materials science and technologies series
Altri autori (Persone)	EhrtDoris
Disciplina	620.1/1
Soggetti	Glass - Effect of radiation on Glass - Additives Glass - Defects Photoionization Multivalent molecules
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [75]-77) and index.
Nota di contenuto	Intro -- PHOTOIONIZATION OF POLYVALENT IONS -- PHOTOIONIZATION OF POLYVALENT IONS -- Contents -- Preface -- Acknowledgments -- Introduction -- References -- Index.
Sommario/riassunto	This book examines the effect of polyvalent dopants on photoinduced defect formation in different glasses. Ionisation of the glass matrix results in intrinsic defects, positively charged hole and negatively charged electron centres. Polyvalent dopants can be photooxidised or photoreduced.
