Sommario/riassunto

Walking served as an occasion for the display of power and status in ancient Rome, where great men paraded with their entourages through city streets and elite villa owners strolled with friends in private colonnades and gardens. In this book-length treatment of the culture of walking in ancient Rome, Timothy O'Sullivan explores the careful attention which Romans paid to the way they moved through their society. He employs a wide range of literary, artistic and architectural evidence to reveal the crucial role that walking played in the performance of social status, the discourse of the body and the representation of space. By examining how Roman authors depict walking, this book sheds new light on the Romans themselves - not only how they perceived themselves and their experience of the world, but also how they drew distinctions between work and play, mind and body, and Republic and Empire.

Sommario/riassunto

"This work presents a longitudinal study, of greater than 10 years, of all the major peace building initiatives with an educational encounter-based approach in Israel and Palestine, during times of relative peace and times of acute violence (1993-2008). Involving various fields, this research contributes to the broad fields of peace and conflict resolution, social movements, and organizational studies"--
