

1. Record Nr.	UNINA9910974429503321
Titolo	Chemical, mechanical and materials engineering II : selected, peer reviewed papers from the 2013 2nd International Conference on Chemical, Mechanical and Materials Engineering (CMME 2013), January 20-21, 2013, Melbourne, Australia // edited by Jun Zhang and Qi Luo
Pubbl/distr/stampa	Durnten-Zurich, Switzerland : , : Trans Tech Publications, , [2013] ©2013
ISBN	9783038260677 3038260673
Edizione	[1st ed.]
Descrizione fisica	1 online resource (636 p.)
Collana	Applied mechanics and materials ; ; volume 319
Altri autori (Persone)	LuoQi ZhangJun
Soggetti	Chemical engineering Materials Mechanical engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Chemical, Mechanical and Materials Engineering II -- Preface and Organizing Committee -- Table of Contents -- Chapter 1: Material Engineering and Technology -- Crystal Structure and Luminescence of SrAl ₂ O ₄ : Eu ²⁺ , Dy ³⁺ Phosphor Prepared by Nano-Pseudoboehmite Particulate Peptizing Method -- Study of Electrical and Aging Properties on the La-Doped Aurivillius Phase Ferroelectrics BaBi ₄ Ti ₄ O ₁₅ -- Kinetics of Atmospheric Acid Leaching of a Limonitic Laterite -- Melting Temperature of MgO under Pressure -- Distribution and Intensity of the Built-in Field in Poled Silica Thermally Based on a Junction Model -- Preparation and Sizing Application of ASA\Liquid Paraffin Stabilized by Grafted Montmorillonite -- Microstructure and Oxidation Resistance of Muscovite-Glass Frits Loaded High Silica Cloth/Boron-Containing Phenol-Formaldehyde Resin-Based Ceramifying Composites -- Catalytic Spectrophotometric Determination of Trace H ₂ O ₂ Using Fe ₃ O ₄ Nanoparticles as Peroxidase Mimetics -- Ultrafast Response Humidity Sensor Based on Electrospun Porous BaTiO ₃ Nanofibers --

Dependence of Thermodynamic and Optical Properties on Glass Compositions in Low-Phonon Energy Heavy-Metal Gallate Glass System -- Evaluation of Properties of FIB Deposited Metal Layer and Application to Temperature Sensing -- High Hydrophilic Poly(Ethylene Terephthalate)(PET) Fabric Modified by Ionic Agent -- Physical Properties of High-Temperature Liquid Furnace Slags -- A Durable Superhydrophilic Modification of Polyester Fabric -- Chapter 2: Material Processing and Machining, Surface and Coating Technologies -- Study on the Properties of CrN Coating Prepared on 3Cr2W8V by Electron Beam Surface Alloying Process -- Wear Mechanism of Si3N4/TiC Micro-Nano-Composite Ceramic Tool in Dry Machining of Nodular Cast Iron. Optical Properties of Electrodeposited Alumina Thin Films by Using Spectroscopic Ellipsometer -- Weakly Nonlinear Stability Analysis of a Thin Power-Law Fluid during Spin Coating -- Surface Modification of SKD 61 by Electrical Discharge Coating (EDM/EDC) with Multilayer Cylindrical Electrode and Jatropa Curcas as Dielectric Fluid -- Application of Plasma Technology in Surface Modification of Carbon Materials -- Improvement of Surface Figure in the Polyurethane Pad Continuous Polishing Process -- Chapter 3: Bio-, Chemical and Medical Engineering and Technologies -- Histological Study of the Toxic Effects of Solder Fumes on Spermatogenesis in Rats -- Gene Polymorphism and Susceptibility to Brucellosis -- Microwave Induced Pyrolysis of Biomass -- pH-Effect on Sinterability, Mechanical Properties and Cytotoxicity of Hydroxyapatite-Based Bone Grafts -- Fusion, Expression and Identification on the mpb51 and mpb63 Genes of Mycobacterium bovis -- Prokaryotic Expression and Identification on the 20kDa Protein Gene of Mycobacterium paratuberculosis -- An Application of the Differential Transform Method to the Biochemical Reaction Systems -- An Immunonanoparticle Surface-Enhanced Resonance Raman Scattering Method for Determination of Human Chorionic Gonadotrophin -- Novel Silkworm Pupa Protein (SPP) /Polyester Fabric -- Study on the Effect of Sericin Content on Solubility of Silk Fibroin and the Properties of Silk Fibroin Membranes -- PCR Detection of Mycobacterium bovis DNA in Cattle Bloods -- Extraction Technology and Physicochemical Properties of Broccoli Protein -- A New Spectrophotometric Method for the Determination of Trace O₃ Using the Particle Reaction of Rhodamine 6G-I3 -- Analysis of Environmental Disruptors in a Wastewater Treatment Plant -- Oscillatory Calcium Concentration Designed through pH Dependent Equilibrium.

State Feedback Control May Change the Dynamic Behavior of the Biochemical Process - Mathematical Model and Analysis -- Chapter 4: Material Synthesis -- Synthesis of Core-Shell Particles Consisted of Polysiloxane and Poly(butyl methacrylate-styrene-acrylonitrile) by Microemulsion Polymerization -- Nanoscale Iron-Manganese Binary Oxide for As(III) Removal in Synthesized Groundwater -- The Effects of Particle Size and Morphology of Raw Materials on the Properties of MoSi₂ Synthesized by SHS -- Low Temperature Synthesis of High Quality Zirconium Carbide Powder -- Chapter 5: Paper Processing and Biomass Industry -- Microwave Induced Co-Processing of Biomass/Coal Blends -- Pickering-Type Emulsions of ODSA Sizing Agent Stabilized by Nano-Montmorillonite and N-Dodecane -- Refining Energy Consumption and Fiber Development on CMC-Pretreated Poplar APMP -- Adsorption of 4-Chlorophenol onto Activated Carbon Prepared from Wheat Straw: Equilibrium Study -- The Biomass Control in a Biochemical Reactor Process with Time-Varying Dilution Rate: A Mathematical Study -- Chapter 6: Product Design and Production Management -- The Gene Ontology for Product Image Design --

Stabilized Dune Sand for Road Foundation Layers - Case of the Dune Sand of the Region of Djelfa (Algeria) -- The Application of Color Symbol to Product Design -- The Study on the University Sports Teams in Information Management -- The Theoretical Analysis on Cognitive Process of the Safety Signs Based on Neuro-IE -- Chapter 7: Data Acquisition, Processing and Analysis -- Batch Gating for Data Association in Monocular SLAM -- A BOC Signal Synchronization Algorithm Based on TK Operator -- Spatial and Temporal Distribution Differences of Acid Rain in Heshan China -- Image Processing Algorithm for the Manipulation of Object Using 3D Sensor -- Design of WSN Gateway for Granary Information Monitoring.

The Design of Granary Storage Monitoring Node Based on Wireless Sensor Network -- The Study of Characteristic of Drivers Visual Attention Based on Driving Simulation Device -- Research on Vulnerability of Aquifer to Petroleum Hydrocarbon Basing on the ANN and GIS -- Feature Selection Based on Ant Colony Optimization for Image Classification -- Measurement on Reaction Time of Visual Attention in Depth during Driving -- Chapter 8: Algorithms -- A Method for Completeness Testing of Dimensioning in 2D Drawing -- The Simplification Algorithm and Characteristic Analysis of Variable Cross-Section Beam of Machining Center -- The Segmentation Algorithm for Pavement Cracking Images Based on the Improved Fuzzy Clustering -- Chapter 9: Manufacturing and Equipment Technologies, Mechanical Engineering -- Composite Squeeze Casting of Large Parts -- Experimental Study on Depth of Discharge and Cycle Life of Lithium-Ion Battery -- Application of Tamping Coke on Large-Scale BF Smelting -- Mobile Inspection Robot -- The Performance Analysis and Prognosis Techniques of Gearbox -- Research Progress of Manufacturing Technology of Enhanced Heat Transfer Structures -- Research on New Weighing System of Large Structure -- Study on Adjustment of Large Structure Objects' Shipment Processing by Trailers -- Development of a Parallel-Series Stabilized Platform System -- New Methods to Evaluate Diesel Smoke from Inspection/Maintenance Vehicles Using Integration of Smoke Emissions over a Measurement Cycle of Snap-Acceleration Test at no Load -- Investigation of the Lox/Alcohol Propulsion System -- Chapter 10: Engineering and Applied Mechanics -- Thermoelastic Coupling Vibration of the Moving Rectangular Plate -- An Experimental Study on Flexural Behavior of Reinforced Concrete Beams with GFRP Bars and Recycled Coarse Aggregate.

Numerical Simulation of the Piercing Process of Large-Sized Seamless Steel Tube -- Wavelet-Petrov-Galerkin Method for Numerical Solution of Boussinesq Equation -- Mechanical Property, HIC and SSCC Test Analysis of L245NS Anti-Sulfur Bending Pipe -- Electroosmotic Flow and Heat Transfer in Microchannels: A Closed Form Solution -- Influence of Punch Velocity and Strength Matching on the Quality of SPR with Half-Hollow Rivet Based Numerical Simulation -- Three-Dimensional Parametric Modeling and Finite Element Analysis of Drum on Belt Conveyer -- Chapter 11: Optimization -- Optimal Aircraft Maintenance Crews Work Shifts with Integer Programming -- The Applications of Neural Networks in the Engineering Cost of Transmission Line -- Solution to Holes Machining Path Planning by Intelligence Computation -- Designing Hydrogen Networks with Multiple Impurities by Combining Concentration Potential Method with Sources Matching Methods -- Study on 3D Shape Optimization for Hydrodynamic Journal Bearing Using Goal Attainment Multi-Objective Function -- Chapter 12: Automation and Detection Technologies -- Spectrophotometric Determination of Trace Hg²⁺ with hsDNA-Modified Nanosilver Probe -- A Method of RAM-Based Frequency

Acquisition for Base Station Positioning Receiver -- The Detection of Surface Quality On-Line Based on Machine Vision in the Production of Bearings -- Weakened Support Detection Based on Road Slab Vibration Response -- Hand/Eye Calibration Using 3D-3D Correspondences -- Method for Estimating the Domino Effect in Quantitative Assessment -- Study on Detection of Structures Crack Based on Digital Image Technology -- The Research on Motion Trajectory Planning of an Axis Vehicle during Transport -- Chapter 13: Control and PID Control Technologies -- The Application of Fuzzy Control in Position Control for Tanker Drag.
Near-Optimality in Stochastic Control of Predator-Prey System with Markov Switching.

Sommario/riassunto

Selected, peer reviewed papers from the 2013 2nd International Conference on Chemical, Mechanical and Materials Engineering (CMME 2013), January 20-21, 2013, Melbourne, Australia.
