

1. Record Nr.	UNINA9910974430003321
Titolo	Earthquake engineering for concrete dams : design, performance, and research needs // Panel on Earthquake Engineering for Concrete Dams, Committee on Earthquake Engineering, Division of Natural Hazard Mitigation, Commission on Engineering and Technical Systems, National Research Council
Pubbl/distr/stampa	Washington, D.C., : National Academy Press, 1990
ISBN	9786610212217 9781280212215 1280212217 9780309594981 0309594987 9780585155401 0585155402
Edizione	[1st ed.]
Descrizione fisica	1 online resource (x, 143 pages) : illustrations
Altri autori (Persone)	CloughRay W. <1920->
Disciplina	627/.8
Soggetti	Concrete dams - Design and construction Concrete dams - Earthquake effects Earthquake engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Ray W. Clough, Chairman, Panel on Earthquake Engineering for Concrete Dams."
Nota di bibliografia	Includes bibliographical references [p. 127-143].
Nota di contenuto	Earthquake Engineering for Concrete Dams: Design, Performance, and Research Needs -- Copyright -- Contents -- Executive Summary -- EARTHQUAKE INPUT -- LINEAR RESPONSE ANALYSIS -- NONLINEAR RESPONSE ANALYSIS -- OBSERVATIONAL EVIDENCE -- SEISMIC PERFORMANCE CRITERIA -- 1 Introduction -- THE HAZARD OF DAMS -- SEISMIC SAFETY OF CONCRETE DAMS -- SCOPE OF THE REPORT -- 2 Earthquake Input -- EARTHQUAKE EXCITATION CONCEPTS -- Standard Base Input Model -- Massless Foundation Rock Model -- Deconvolution Base Rock Input Model -- Free-Field Input Model -- PRESENT STATUS OF KNOWLEDGE -- Prediction of Free-Field Motion -- Two-Dimensional Case-Method -- Two-Dimensional Case-Results --

Three-Dimensional Case -- Applicability of the Results -- Measured
Motions of Foundation Rock -- Predicted Response to Spatially Varying
Input -- Dynamic Excitation -- Fault Displacement -- STATUS OF
STRONG-MOTION INSTRUMENT NETWORKS -- RESEARCH NEEDS -- 3
Analysis of Linear Response -- PRELIMINARY COMMENTS -- STATIC
ANALYSIS -- Traditional Analysis and Design -- Earthquake
Performance of Koyna Dam -- Limitations of Traditional Procedures --
DYNAMIC ANALYSIS -- Arch Dam Analysis Forerunner -- Finite Element
Modeling -- Foundation Model Deficiency -- Limitations of Reservoir
Water Interaction Models -- PRESENT KNOWLEDGE AND CAPABILITIES
-- Conclusions About Interaction Effects -- Dynamic Analysis
Procedures and Computer Programs -- Two-Dimensional Analysis --
Three-Dimensional Analysis -- Simplified Dynamic Analysis Procedures
-- RESEARCH NEEDS -- 4 Nonlinear Analysis and Response Behavior --
INTRODUCTION -- CHARACTERISTICS OF NONLINEAR BEHAVIOR --
MATERIAL MODELS AND RESPONSE ANALYSIS -- CRITERIA FOR SAFETY
EVALUATION -- SUMMARY OF RECENT RESEARCH -- Experimental
Research -- Models for Concrete Cracking -- Analytical Research --
RESEARCH NEEDS.
5 Experimental and Observational Evidence -- EARTHQUAKE
EXPERIENCE -- Cases with Strongest Shaking -- Cases with Recorded
Responses -- Analyses to Reproduce Earthquake Response -- FIELD
VIBRATION TESTS: FORCED AND AMBIENT -- MODEL TESTS --
RESEARCH NEEDS -- 6 Recommended Criteria for Evaluating Seismic
Performance -- BACKGROUND -- PRELIMINARY CONSIDERATIONS --
Initial Conditions Resulting from Static Loads -- Effects of Construction
Sequence -- Temperature Effects -- Creep Effects -- Uplift --
Deformation Modulus of Foundation Rock -- Two-Dimensional Versus
Three-Dimensional Analytical Models -- GUIDELINES FOR EVALUATING
RESULTS FROM LINEAR ANALYSES -- Concrete Strengths During
Earthquake Loading -- Compression -- Tension -- Shear -- Evaluating
Seismic Performance -- Arch and Gravity Dams -- Buttress Dams --
GUIDELINES FOR EVALUATING RESULTS FROM NONLINEAR ANALYSES --
GUIDELINES FOR EVALUATING FOUNDATION STABILITY -- Sliding
Stability Along Concrete-Foundation Contacts -- Sliding Stability Within
Foundations -- STABILITY FOLLOWING FAULT DISPLACEMENT --
EVALUATION OF CRITERIA -- Present Criteria -- Deformation-Based
Criteria -- Probability-Based Criteria -- RESEARCH NEEDS --
