ISBN	0-00-759568-9
Disciplina	303.48/33
Lingua di pubblicazione	Inglese
Formato	Musica
Livello bibliografico	Monografia
Sommario/riassunto	<p>A brilliant examination into how the internet is profoundly changing the way we think. In this groundbreaking book, Wired writer Clive Thompson argues that the internet is boosting our brainpower, encouraging new ways of thinking, and making us more not less intelligent as is so often claimed. Our lives have been changed utterly and irrevocably by the rise of the internet and it is only now that we can begin to analyse this extraordinary phenomenon. The author argues that as we rely more and more for machines to help us think, our thinking itself is becoming richer and more complex. We're able to learn more, retain it longer, to write in curious new forms, and even to think entirely new types of thoughts. Outsmart is filled with stories of people who are living through these profound technological changes. In a series of postcards from the near future, we meet characters such as Gordon Bell, an ageing millionaire who is saving a digital copy of everything that happens to him, and Eric Hovitz, one of the world's leading artificial-intelligence researchers, who is creating software that is designed to let your computer sense your mood and then predict when you're going to be most productive at work. Lucidly written and argued, Outsmart is a breathtaking original look at our Brave New World.</p>

2. Record Nr.	UNINA9910974448403321
Autore	Augustine, of Hippo, Saint, <354-430.>
Titolo	Eighty-three different questions // Saint Augustine ; translated by David L. Mosher
