Gender Roles and Secular Achievement Among Israeli and American Jews -- CHAPTER 8 Conclusions -- Appendixes -- APPENDIX I Methodology of the National Jewish Population Survey -- APPENDIX II Jewishness Factors -- APPENDIX III Methods of Analysis -- APPENDIX IV Profile of Israeli Society -- NOTES -- BIBLIOGRAPHY -- NAME INDEX -- SUBJECT INDEX
Sommario/riassunto	Gender Equality and American Jews studies gender equality in education, labor force participation, and occupational achievement

among American Jews, based on the 1990 National Jewish Population Survey. It first focuses on education and training as key "gatekeepers" to roles in the economy, and then on the gender differences in labor force behavior and occupational attainment. To place American Jews in perspective, they are compared to the wider American population, and to Israeli Jews, presenting a multi-dimensional analysis of American Jewishness in the 1990s. The difficulties of comparing Israel and American Jews are discussed, lending insights into the similarities and differences between the two cultures. The authors draw on a solid base of sociological literature, placing American Jews in the wider American context with comparative data. The book discusses the conclusions that can be drawn from the analysis along with some policy implications.
