

1. Record Nr.	UNINA9910974459403321
Autore	Harrap Simon
Titolo	Tits, nuthatches & treecreepers / / Simon Harrap ; illustrated by David Quinn
Pubbl/distr/stampa	London, : Christopher Helm, 1996
Descrizione fisica	464 p. : col. ill., col. maps
Collana	Helm identification guides
Altri autori (Persone)	QuinnDavid
Soggetti	Nuthatches Titmice Creepers (Birds)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Digital editions published 2010."--T.p. verso.
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	The chickadees, titmice, nuthatches, and treecreepers include some of the best-known birds in the world. They also number among them some species so rare that they have been seen by only a handful of birdwatchers. This is the first guide to cover all of these families across the globe. The comprehensive text provides extensive information about each species, including identification, description, vocalizations, geographical distribution and variation, habits, habitats, breeding biology, and relationships. Beautifully drawn full-color plates detail all of the species, and the book includes over 100 color maps and additional line drawings. This is the only guide of its kind. It covers the many members of these popular bird families, which count among them chickadees, titmice, penduline tits, Verdin, Bushtit, long-tailed tits, nuthatches, treecreepers and Wallcreeper. With its worldwide coverage, the book reaches far beyond Europe and North America to encompass the many exciting species to be found in Africa and Asia. Its illustrations are similarly unique and extensive. The author is a well-known writer who is on the editorial board of Birding World magazine and a regular contributor to Bird Watching. The illustrator is an award-winning artist who has been named "Bird Illustrator of the Year" by British Birds magazine. Here is an authoritative guidebook that will

appeal to both casual birders and professional ornithologists alike. It is a wonderful resource for anyone who has a birdfeeder and for everyone with an interest in birds.
