Sommario/riassunto

This collection of twenty articles, selected from the 33rd annual Linguistic Symposium on Romance Languages held at Indiana University in 2003, presents current theoretical approaches to a variety of issues in Romance linguistics. Invited speakers Luigi Burzio and José Ignacio Hualde contribute papers on the paradigmatics and syntagmatics of Italian verbal inflection and comparative/diachronic Romance intonation, respectively. The other papers, whose authors include both well-known researchers and younger scholars, represent such areas as French syntax (both synchronic and diachronic), second language acquisition (Spanish & English), Spanish intonation, phonology, syntax, and semantics, Italian semantics, Romanian morphology and syntax, Catalan phonology and morphology, and Galician phonology (two papers). The volume is rounded out by three explicitly comparative studies, one on proto-Romance phonology, one on microvariation in Romance syntax, and a third addressing syntactic microvariation among varieties of French and French-based creoles. Frameworks represented include Optimality Theory, Minimalism, and Construction Grammar.
