Sommario/riassunto	This work focuses on computational methods in continuum thermomechanics. The text is based on the author's lectures, which ensures a didactical and coherent buildup. The main emphasis is put on the presentation of ideas and qualitative considerations, illustrated by specific examples and applications. Conditions and explanations that are essential for the practical application of methods are discussed thoroughly.

Sommario/riassunto	This inspiring, engagingly written book, with its personal approach and global scope, is the first to explore women's increasingly influential role in the wine industry, traditionally a very male-dominated domain. Women of Wine draws on interviews with dozens of leading women winemakers, estate owners, professors, sommeliers, wine writers, and others in the United States, the United Kingdom, France, Italy, Australia, New Zealand, and elsewhere to create a fascinating mosaic of the women currently shaping the wine world that also offers a revealing insiders' look at the wine industry. To set the stage, Ann B. Matasar chronicles the historical barriers to women's participation in the industry, reviews post-World War II changes that created new opportunities for them, and pays tribute to a few extraordinary nineteenth-century women who left their mark on wine despite the

odds against them. She then turns to her primary topic: an accessible discussion of women associated with some of the most prestigious wineries and institutions in both the Old and New Worlds that emphasizes their individual and collective contributions. Matasar also considers issues of importance to women throughout the business world including mentors, networking, marriage, family, education, self-employment versus the corporate life, and risk taking.

Sommario/riassunto

This volume brings together eight case studies which describe a variety of initiatives to create more effective schools for children of poverty, especially in the Third World. The initiatives reviewed published and unpublished documents and both qualitative and statistical studies were examined. Countries include Brazil, Burundi, Colombia, Ghana, Nepal, Sri Lanka, Thailand and the United States. Each initiative was developed independently to address unique challenges and situations but taken as a group, the features of the approaches described in this volume can be viewed as a basis for con
