Titolo	m_Health Current and Future Applications / / edited by Giuseppe Andreoni, Paolo Perego, Enrico Frumento
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-030-02182-3
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (154 pages)
Collana	EAI/Springer Innovations in Communication and Computing, , 2522-8595
Disciplina	362.1068 610.285
Soggetti	Electrical engineering Signal processing Image processing Speech processing systems Medical informatics Health services administration Communications Engineering, Networks Signal, Image and Speech Processing Health Informatics Health Care Management
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Introduction -- The mHealth -- mHealth market exploitation through the analysis of the related Intellectual Property Rights -- Cybersecurity and the evolutions of healthcare -- Device for mHealth -- Big Data and signal processing in mHealth -- M-health services: examples and future perspectives -- The Healthcare System Perspective in mHealth -- Conclusions.
Sommario/riassunto	This book describes current trends in m_Health technology, systems, and applications. The book proposes a multifaceted view on m-Health opportunities and requirements starting from four aspects: patient, technology, design and innovation. The analysis is completed by a market segmentation overview and by the most recent research

experiences to offer a complete benchmark and vision of m_Health for today and tomorrow. The contributions are based on the outcomes of initiatives on the future of healthcare, funded by the EU in the frame of FP7 and Horizon 2020 and their deployment into real clinical practice. Throughout the book, clinicians, technicians, researchers, and end-users debate their experience, needs, risks, opportunities, and available solutions in this fast moving field. • Presents innovations, analysis, and applications using m_health solutions; • Provides a multidisciplinary approach by presenting technological aspects of m-health in adding to outcomes of clinical trials using m_health systems; • Discusses current innovation programs that supports citizens' empowerment through self-management of health and disease, health promotion, and disease prevention.

Sommario/riassunto

From the vantage point of nearly sixty years devoted to research and

the writing of history, J. H. Elliott steps back from his work to consider the progress of historical scholarship. From his own experiences as a historian of Spain, Europe, and the Americas, he provides a deft and sharp analysis of the work that historians do and how the field has changed since the 1950s. The author begins by explaining the roots of his interest in Spain and its past, then analyzes the challenges of writing the history of a country other than one's own. In succeeding chapters he offers acute observations on such topics as the history of national and imperial decline, political history, biography, and art and cultural history. Elliott concludes with an assessment of changes in the approach to history over the past half-century, including the impact of digital technology, and argues that a comprehensive vision of the past remains essential. Professional historians, students of history, and those who read history for pleasure will find in Elliott's delightful book a new appreciation of what goes into the shaping of historical works and how those works in turn can shape the world of thought and action.
