

1.	Record Nr.	UNINA9910978224903321
	Autore	Dang Sarah-Mai
	Titolo	Doing Digital Film History
	Pubbl/distr/stampa	De Gruyter, 2024
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNINA9910616375303321
	Titolo	Cancer Prevention Through Early Detection : First International Workshop, CaPTion 2022, Held in Conjunction with MICCAI 2022, Singapore, September 22, 2022, Proceedings / / edited by Sharib Ali, Fons van der Sommen, Bartomiej Wadysaw Papie, Maureen van Eijnatten, Yueming Jin, Iris Kolenbrander
	Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2022
	ISBN	9783031179792 303117979X
	Edizione	[1st ed. 2022.]
	Descrizione fisica	1 online resource (175 pages)
	Collana	Lecture Notes in Computer Science, , 1611-3349 ; ; 13581
	Disciplina	616.0754
	Soggetti	Image processing - Digital techniques Computer vision Machine learning Computers Application software Computer Imaging, Vision, Pattern Recognition and Graphics Machine Learning Computing Milieux Computer and Information Systems Applications
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia

Intro -- Preface -- Organization -- Contents -- Classification -- 3D-Morphomics, Morphological Features on CT Scans for Lung Nodule Malignancy Diagnosis -- 1 Introduction -- 2 Methods -- 2.1 Data Sets -- 2.2 Data Analysis Models -- 3 Results -- 3.1 3D-Morphomics -- 3.2 Lung Nodule Diagnosis Performances of 3D-Morphomics -- 4 Conclusions -- References -- .26em plus .1em minus .1emSelf-supervised Approach for a Fully Assistive Esophageal Surveillance: Quality, Anatomy and Neoplasia Guidance -- 1 Introduction -- 2 Related Work -- 3 Method -- 3.1 Self-supervision Solving Jigsaw Puzzle -- 3.2 Fine-Tuning with Angular Margin Loss -- 4 Experiments and Results -- 4.1 Implementation Details -- 4.2 Data Collection and Evaluation Metrics -- 4.3 Comparison with SOTA Methods -- 4.4 Qualitative Analysis -- 5 Conclusion -- References -- Multi-scale Deformable Transformer for the Classification of Gastric Glands: The IMGL Dataset -- 1 Introduction -- 2 Related Works -- 3 Materials and Methods -- 3.1 IMGL Dataset Description -- 3.2 The Proposed IMGL-VTNet Architecture -- 3.3 Multi-scale Deformable Transformer Encoder -- 4 Experimental Results -- 4.1 A Comparison of State-of-the-Art Methods: IMGL Dataset -- 4.2 Feature Map Scales Analysis -- 4.3 Application of the Proposed Model to Pedestrian Detection -- 5 Conclusion -- References -- Parallel Classification of Cells in Thinprep Cytology Test Image for Cervical Cancer Screening -- 1 Introduction -- 2 Method -- 2.1 Overview -- 2.2 Dual Classifiers in Parallel -- 2.3 Intra-class Compactness -- 2.4 Implementation Details -- 3 Experimental Results -- 3.1 Datasets -- 3.2 Classification Performance -- 3.3 Evolving of the Latent Space -- 4 Discussion and Conclusion -- References -- Detection and Diagnosis -- Lightweight Transformer Backbone for Medical Object Detection -- 1 Introduction -- 2 Methodology. 2.1 Overview of Proposed Method -- 2.2 Feature Map Rearrangement and Reconstruction -- 2.3 Lightweight Transformer on Feature Patches -- 3 Experiments and Results -- 3.1 Dataset and Evaluation Metrics -- 3.2 Implementation Details -- 3.3 Experimental Results -- 4 Conclusion -- References -- Contrastive and Attention-Based Multiple Instance Learning for the Prediction of Sentinel Lymph Node Status from Histopathologies of Primary Melanoma Tumours -- 1 Introduction -- 2 Materials and Methods -- 2.1 Dataset -- 2.2 Multiple Instance Learning -- 2.3 Proposed Model -- 2.4 Self-supervised Contrastive Learning: -- 3 Experimental Set-Up and Results -- 3.1 Feature Extraction -- 3.2 Experiments -- 4 Discussion -- 5 Conclusions -- References -- Knowledge Distillation with a Class-Aware Loss for Endoscopic Disease Detection -- 1 Introduction -- 2 Related Work -- 3 Materials and Method -- 3.1 Datasets -- 3.2 Proposed Knowledge-Distillation Framework -- 4 Experiments and Results -- 4.1 Experimental Setup and Evaluation Metrics -- 4.2 Results -- 5 Conclusion -- References -- IF3: An Interpretable Feature Fusion Framework for Lesion Risk Assessment Based on Auto-constructed Fuzzy Cognitive Maps -- 1 Introduction -- 2 Methodology -- 2.1 Fuzzy Cognitive Maps -- 2.2 Proposed Framework -- 3 Experiments and Results -- 3.1 Dataset Description and Parameter Settings -- 3.2 Interpretable Example of Risk Assessment Using IF3 -- 3.3 Performance Evaluation of IF3 -- 4 Discussion and Conclusions -- References -- Lesion Characterization -- A CAD System for Real-Time Characterization of Neoplasia in Barrett's Esophagus NBI Videos -- 1 Introduction -- 2 Methods -- 2.1 Data -- 2.2 Network Architecture, Training and Evaluation -- 2.3 Video Analysis Methods -- 3 Experimental Results -- 4 Discussion -- 5 Conclusions -- References.

Efficient Out-of-Distribution Detection of Melanoma with Wavelet-Based Normalizing Flows -- 1 Introduction -- 2 Background -- 2.1 Normalizing Flows -- 2.2 Wavelet Flow -- 3 Methods -- 4 Results and Discussion -- 5 Conclusion -- References -- Robust Colorectal Polyp Characterization Using a Hybrid Bayesian Neural Network -- 1 Introduction -- 2 Methodology -- 2.1 Dataset -- 2.2 Bayesian Neural Networks -- 2.3 Model Architecture -- 2.4 Evaluation Metrics -- 3 Results -- 3.1 Experimental Setting -- 3.2 Calibration-performance Assessment -- 3.3 Model Performance Comparison -- 3.4 Generalization and Robustness to Over-Fitting Assessment -- 4 Discussion and Conclusion -- References -- Active Data Enrichment by Learning What to Annotate in Digital Pathology -- 1 Introduction -- 2 Methodology -- 2.1 Annotation Protocol -- 2.2 Dataset Enrichment -- 3 Results -- 3.1 Unsupervised Data Enrichment -- 3.2 Supervised Active Data Enrichment -- 4 Conclusion -- References -- Segmentation, Registration, and Image-Guided Intervention -- Comparing Training Strategies Using Multi-Assessor Segmentation Labels for Barrett's Neoplasia Detection -- 1 Introduction -- 2 Materials and Methods -- 2.1 Data Set -- 2.2 Segmentation Ground-truth Assembly -- 2.3 Network Architecture -- 2.4 Training Details -- 3 Experiments and Results -- 3.1 Metrics -- 3.2 Results -- 4 Discussion and Conclusions -- References -- Improved Pancreatic Tumor Detection by Utilizing Clinically-Relevant Secondary Features -- 1 Introduction -- 2 Related Work on PDAC Detection -- 3 Methods -- 3.1 Data Collection -- 3.2 Segmentation Model for Classification and Localization -- 3.3 Experiments -- 3.4 Data Preparation and Training Details -- 4 Results and Discussion -- 5 Conclusion -- References -- Strategising Template-Guided Needle Placement for MR-targeted Prostate Biopsy -- 1 Introduction -- 2 Method. 2.1 Patient-specific Prostate MR-derived Biopsy Environment -- 2.2 The MDP Components -- 2.3 Policy Learning -- 3 Experiments -- 4 Results -- 5 Discussion and Conclusion -- References -- Semantic-Aware Registration with Weakly-Supervised Learning -- 1 Introduction -- 2 Method -- 2.1 Structural Constraints -- 2.2 Adaptive Registration -- 3 Experiments -- 3.1 Registration Results -- 4 Conclusion -- References -- Author Index.

Sommario/riassunto

This book constitutes the refereed proceedings of the first International Workshop on Cancer Prevention through Early Detection, CaPTion, held in conjunction with the 25th International Conference on Medical Imaging and Computer-Assisted Intervention, MICCAI 2022, in Singapore, Singapore, in September 2022. The 16 papers presented at CaPTion 2022 were carefully reviewed and selected from 21 submissions. The workshop invites researchers to submit their work in the field of medical imaging around the central theme of early cancer detection, and it strives to address the challenges that are required to be overcome to translate computational methods to clinical practice through well designed, generalizable (robust), interpretable and clinically transferable methods.
