Sommario/riassunto

In Welfare Reform, Jeffrey Grogger and Lynn Karoly assemble evidence from numerous studies to assess how welfare reform has affected behavior. To broaden our understanding of this wide-ranging policy reform, the authors evaluate the evidence in relation to an economic model of behavior.

Sommario/riassunto

This book explores fundamental and experimental aspects of excitons in semiconductors. It begins with an introduction to crystal lattice,

band structure of solids, effective mass theory, and holes. It then explores the binding energy of various excitons and their complexes (such as trions and biexcitons) in different dimensions within the framework of effective mass approximation, discusses the absorption and emission of photons during their creation and recombination processes providing experimental examples in photo-absorption and photoluminescence (PL) spectroscopy. Theoretical foundations for calculating the dielectric function associated with excitons along with the concept of 'exciton-polaritons' are introduced. The book also examines the interaction between excitons and phonons, which is illustrated with experimental findings. Further, it discusses the effects of magnetic field on the energy eigenstates of excitons, and talks about polarization-resolved spectroscopy under magnetic field for identifying excitons and obtaining deeper insight of the excitonic structure as well as the semiconductor band structure. Lastly, it delves into the manybody effects i.e. Bose-Einstein condensation of excitons and excitonic Mott transition, presenting recent experimental findings and potential applications. Throughout, emphasis is placed on elucidating fundamental concepts while keeping readers abreast of the latest developments in the field. With a focus on experimental methods and data interpretation, the book serves as an invaluable resource for both graduate students and research scholars.

Sommario/riassunto	Intellectual exchange among African creative writers is the subject of this highly innovative and wide-ranging look at several forms of intertextuality on the continent. Focusing on the issue of the availability of old canonical texts of African literature as a creative resource, this study throws light on how African authors adapt, reinterpret, and redeploy existing texts in the formulation of new ones. Contemporary African writers are taking advantage of and extending the resources available in the existing native literary tradition. But the field of inter-
