

1. Record Nr.	UNINA9910980481003321
Autore	Shah Ankur
Titolo	Applied Home Hemodialysis : A Clinical Guide // edited by Ankur Shah, Anjay Rastogi, Edgar V. Lerma
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2024
ISBN	9783031772443 303177244X
Edizione	[1st ed. 2024.]
Descrizione fisica	1 online resource (386 pages)
Altri autori (Persone)	RastogiAnjay LermaEdgar V
Disciplina	616.61
Soggetti	Nephrology Hematology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Home Dialysis - Dialysis Modality Selection -- History of Home Hemodialysis -- Dialysis Adequacy -- Survival at Home -- Cardiovascular Outcomes associated with Frequent Hemodialysis -- Complications of Home Hemodialysis -- Vascular Access in Home Hemodialysis -- Patient Training and Preparation of the Home for Dialysis -- Technique Survival, Psychosocial Aspects, Respite Care, and Discontinuation in Home Hemodialysis -- Home Hemodialysis Program Development -- Water Treatment and Dialysate Production in the Home -- PEDIATRIC APPLICATIONS OF HOME HEMODIALYSIS -- Home Hemodialysis in the Elderly -- Fertility and Pregnancy Considerations for Patients on Home Hemodialysis -- International Applications of Home Hemodialysis: Barriers and How They Can Be Overcome -- HHD during a pandemic and disaster management -- GREEN NEPHROLOGY IN HOME HAEMODIALYSIS -- Anemia Management in Home Hemodialysis -- Home Dialysis - Chronic Kidney Disease and Mineral and Bone Metabolism -- Nutrition and Home Hemodialysis.
Sommario/riassunto	Applied Home Hemodialysis is an essential resource for nephrologists, renal fellows, and healthcare professionals involved in the care of patients with end-stage kidney disease. As the landscape of dialysis care rapidly evolves, with a growing emphasis on home-based

therapies, this comprehensive textbook fills a critical education gap in the field of home hemodialysis. This volume offers a practical, case-based approach to home hemodialysis. It covers crucial topics such as modality selection, dialysis adequacy, cardiovascular outcomes, vascular access, and program development. The book also addresses unique aspects of home hemodialysis, including use in pediatric and elderly populations, psychosocial considerations, disaster management, and green nephrology practices. Written by experts in the field, this book is both a didactic and bedside reference for the practicing nephrologist. As the nephrology community works towards increasing home dialysis utilization, this textbook offers an indispensable guide for practitioners at all levels of experience.
