Sommario/riassunto	This book comprises the proceedings of the 28th International Conference on Hydraulics, Water Resources, River and Coastal Engineering (HYDRO 2023) focusing on broad spectrum of emerging opportunities and challenges on the impact of climate change on water resources. It covers a range of topics, including, but not limited to, climate change assessment and downscaling issues, climate change impact and adaptive measures, influence of climate variability on hydro-climatic variables, impact of climate change on water resources of Indian Rivers, etc. Presenting recent advances in the form of illustrations, tables, and text, the content offers readers insights for their own research. In addition, the book addresses fundamental

concepts and studies on the impact of climate change on water resources, making it a valuable resource for both beginners and researchers wanting to further their understanding of hydraulics, water resources and coastal engineering.

Sommario/riassunto	This volume is a manifestation of the continuing interest of scholars at the University of Michigan in Philippine studies. Written by a generation of post-colonial scholars, it attempts to unravel some of the historical problems of the colonial era. Again and again the authors focus on the relationship of the ilustrados and the Americans, on the problems of continuity and discontinuity, and on the meaning of "modernization" in the Philippine context. As part of the Vietnam generation, these authors have looked at American imperialism with a new perspective, and yet their analysis is tempered, not strident, and reflective, not dogmatic. Perhaps the most central theme to emerge is the depth of the contradiction inherent in the American colonial experiment.
